1.1 Context

The Nunavut Planning Commission (NPC) is preparing a land use plan to guide and direct resource use and development in the Nunavut Settlement Area (NSA). As part of its efforts, the NPC is facilitating discussions in each Nunavut community on land use and resource management issues. Information that is obtained from these discussions will be used to inform decisions regarding the further development of the Nunavut Land Use Plan (NLUP).

1.2 Purpose

This report presents information obtained during the NPC's visit to the community of Sanikiluaq. The purpose of the report is to inform decisions regarding the further development of the NLUP, ensuring that the plan reflects the priorities and values of residents.

It is important to note that the information contained in the Community Report will be considered in conjunction with all other feedback when revising the DNLUP.

1.3 Methodology

Information was presented to and received from participants in Sanikiluaq in accordance with the Nunavut Planning Commission's Community Engagement Strategy (Engagement Strategy). The Engagement Strategy provides for the following methods for presenting and receiving information;

- **Open house;** information contained in the Draft Nunavut Land Use Plan (DNLUP) was presented on 7 multi lingual large format poster boards. Participants were encouraged to review the posters, ask questions and provide feedback.
- **Elected Officials Meeting;** The NPC Chairperson and NPC staff met with senior and elected officials in the community. The development process for the DNLUP, its content and next steps were presented. Comments and questions were recorded during the session and are contained in Appendix 1.

- **Public Workshop;** A formal presentation of the Draft Plan content was provided to participants, including a slide overview of its content. Following the presentation, questions and comments were received from participants. The questions, comments and responses are contained in Appendix 2.

A mapping session followed the presentation of the Draft Plan. The mapping session involved discussions regarding the topics presented in the DNLUP and encouraged participants to identify additional areas and issues important for inclusion in a NLUP. Information received during this session was recorded by NPC staff and is included in Appendix 3.

- **Wrap Up Session;** Staff was available to discuss the areas identified during the mapping and identify any additional issues or areas of interest.

Areas that participants identified during mapping sessions as important to a particular goal have, in the majority of cases, been included in this report as they were recorded. In instances where participants identified an area that was better suited to another goal, the area has been reclassified to the more suitable goal and has been verified as appropriate to do so by the Community.

A follow-up meeting was held on June 4, 2013 to review a draft version of this report with the Hamlet Council, Hunters and Trappers Organization, and Community Lands and Resource Committee. A summary of this meeting is included in Appendix 4.

1.4 Public Awareness

The NPC raised public awareness regarding its visit to Sanikiluaq in accordance with the Engagement Strategy.

The DNLUP and supporting materials were mailed to the Mayor and Council of Sanikiluaq, the Hunters and Trappers Organizations (HTO) in September 2012. In addition, letters of invitation were sent to the Sanikiluaq Mayor and Council and HTO in advance of the NPC's visit to advise of the meetings and to encourage participation. Follow up phone calls were also made.

Public notice of the various events was provided in the following ways:

- **Nunatsiaq News and Nunavut News/North;** notice of community meetings were posted in both newspapers a minimum of 45 days in advance.
- **Co-op cable TV;** notice of community meetings was run a minimum of 45 days in advance for one week and run again for no less than 14 days before the meetings.
- **Community radio;** notices were read by the hosts and a live interview with the Commission Chairperson was conducted.
- **Community bulletin boards;** notices were posted on bulletin boards around the community 45 days and again 14 days in advance of the meetings.
- **Community mail drop;** one page flyers that announced the meetings and their purpose were delivered to the post office in each community for all mail boxes that accept unaddressed ad-mail.
- **nunavut.ca;** the schedule of community visits, the Draft Plan, and all supporting information was available on the Commission's website.

1.5 Community Population and Participation

Sanikiluaq is a community of approximately 810 people (Statistics Canada. 2011 Census). It is located on the Belcher Islands in southern Hudson Bay (see Figure 1).

The Commission visited the community on May 7-8, 2013. The meetings were scheduled for April 30 - May 1, 2013 but were delayed due to weather. The sessions were attended as follows;

- **Elected Officials Meeting;** the Mayor and members of the Hamlet Council and HTO attended the elected officials meeting.
- **Open house;** approximately 10 people attended the open house to review the Draft Plan.
- **Public Workshop;** approximately 55 people attended the presentation of the DNLUP and facilitated mapping sessions. Information was recorded in 2 separate mapping groups.
- **Wrap Up Session;** 0 people attended the wrap up session.

Figure 1. Location of Sanikiluaq

Chapter 2: Protecting and Sustaining the Environment

Protecting and Sustaining the Environment was one of five topics presented to and discussed by participants during the Open House, Elected Officials Meeting, Public Workshop and Wrap up Session, collectively referred to in this document as information sharing and gathering sessions.

2.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Protecting and Sustaining the Environment.

- Key bird habitat sites
- Caribou Habitat sites
- Atlantic Cod Lakes
- Cumulative Impacts
- Transboundary considerations
- Climate change

The importance of these issues and areas to Protecting and Sustaining the Environment was not disputed by participants during the information sharing and gathering sessions.

2.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Protecting and Sustaining the Environment during the information sharing and gathering sessions. These additional areas are;

- Bird Habitat
- Marine mammal habitat
- Fish habitat
- Shellfish
- Polar bear harvesting areas

- Caribou calving grounds
- Beluga habitat
- Walrus habitat

2.3 Areas of importance to Protecting and Sustaining the Environment

Areas and issues discussed during the information sharing and gathering sessions as important to Protecting and Sustaining the Environment are illustrated on Map 1, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4 and Appendix 5.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 1 are considered by the Community to be important to Protecting and Sustaining the Environment.
- In these areas, the community would like the NLUP to encourage activities that support environmental protection and management needs, including wildlife conservation, protection and management.

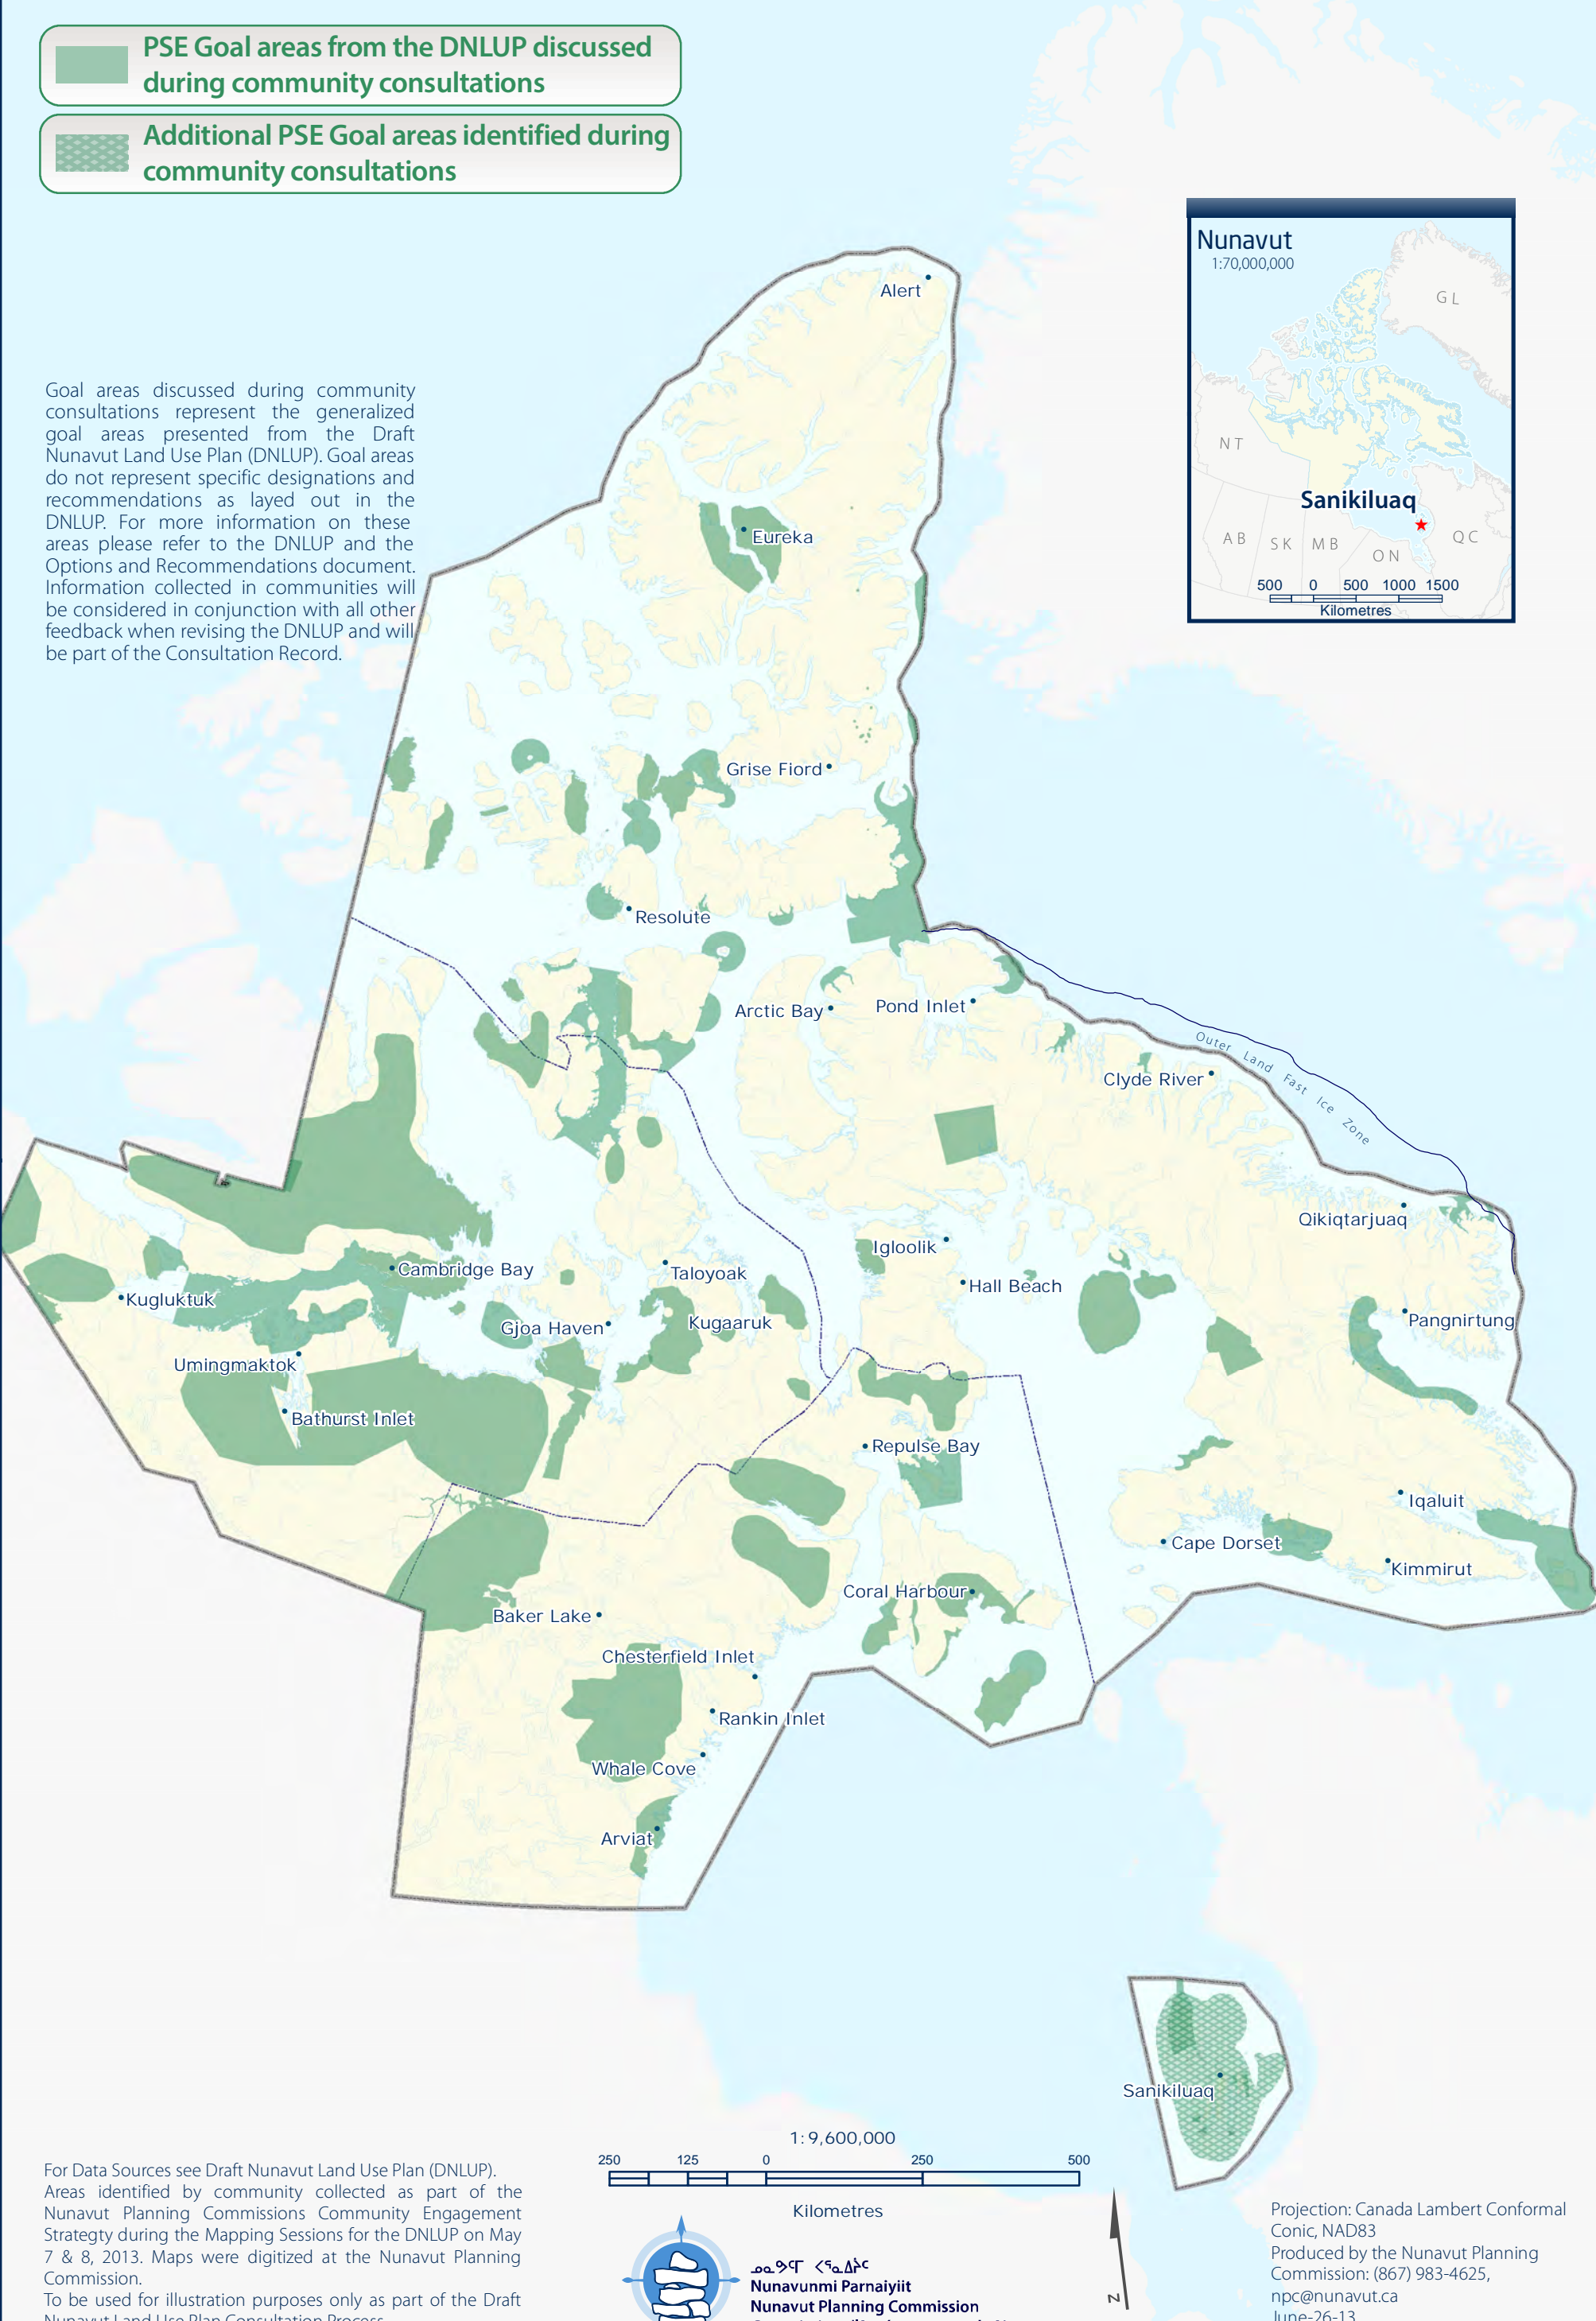

This feedback will be considered in conjunction with all other feedback when revising the DNLUP.

 **PSE Goal areas from the DNLUP discussed during community consultations**

 **Additional PSE Goal areas identified during community consultations**

Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

Chapter 3: Encouraging Conservation Planning

Encouraging Conservation Planning was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

3.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Encouraging Conservation Planning;

- National Parks Awaiting Full Establishment
- Proposed National Parks
- National Marine Conservation Areas
- Thelon Wildlife Sanctuary
- Migratory Bird Sanctuaries
- National Wildlife Areas
- National Historic Sites
- Territorial Historic Sites
- Heritage Rivers

The importance of these issues and areas to Encouraging Conservation Planning was not disputed by participants during the information sharing and gathering sessions.

3.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Encouraging Conservation Planning during the information sharing and gathering sessions. These additional areas are.

- Thule sites and sod houses
- Historic camping sites
- Archaeology sites

- Burial sites

3.3 Areas of importance to Encouraging Conservation Planning

Areas and issues discussed during the information sharing and gathering sessions as important to Encouraging Conservation Planning are illustrated on Map 2, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4 and Appendix 5.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 2 are considered by the Community to be important to Encouraging Conservation Planning.
- In these areas, the community would like the NLUP to encourage activities that support environmental protection and management needs, including wildlife conservation, protection and management.

This feedback will be considered in conjunction with all other feedback when revising the DNLUP.

ECP Goal areas from the DNLUP discussed during community consultations

Additional ECP Goal areas identified during community consultations

Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

Chapter 4: Building Healthier Communities

Building Healthier Communities was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

4.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Building Healthier Communities;

- Areas of Community Interest
- Community Land Use
- Transportation Infrastructure
- Unincorporated Communities
- Alternative Energy Sources
- Community drinking water supplies
- Land remediation
- Northern Contaminated Sites Program
- Aerodromes
- Canadian Forces Station
- Northern Warning System sites

The importance of these issues and areas to Building Healthier Communities was not disputed by participants.

4.2 Areas identified by participants

Additional areas and issues were identified by participants as important to contributing to the goal of Building Healthier Communities during the information sharing and gathering sessions. These additional areas are;

- Contaminated sites

- Drinking water

4.3 Areas of importance to Building Healthier Communities

Areas and issues discussed during the information sharing and gathering sessions as important to Building Healthier Communities are illustrated on Map 3, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4 and Appendix 5.

Based on discussions with participants, the NPC understands that:

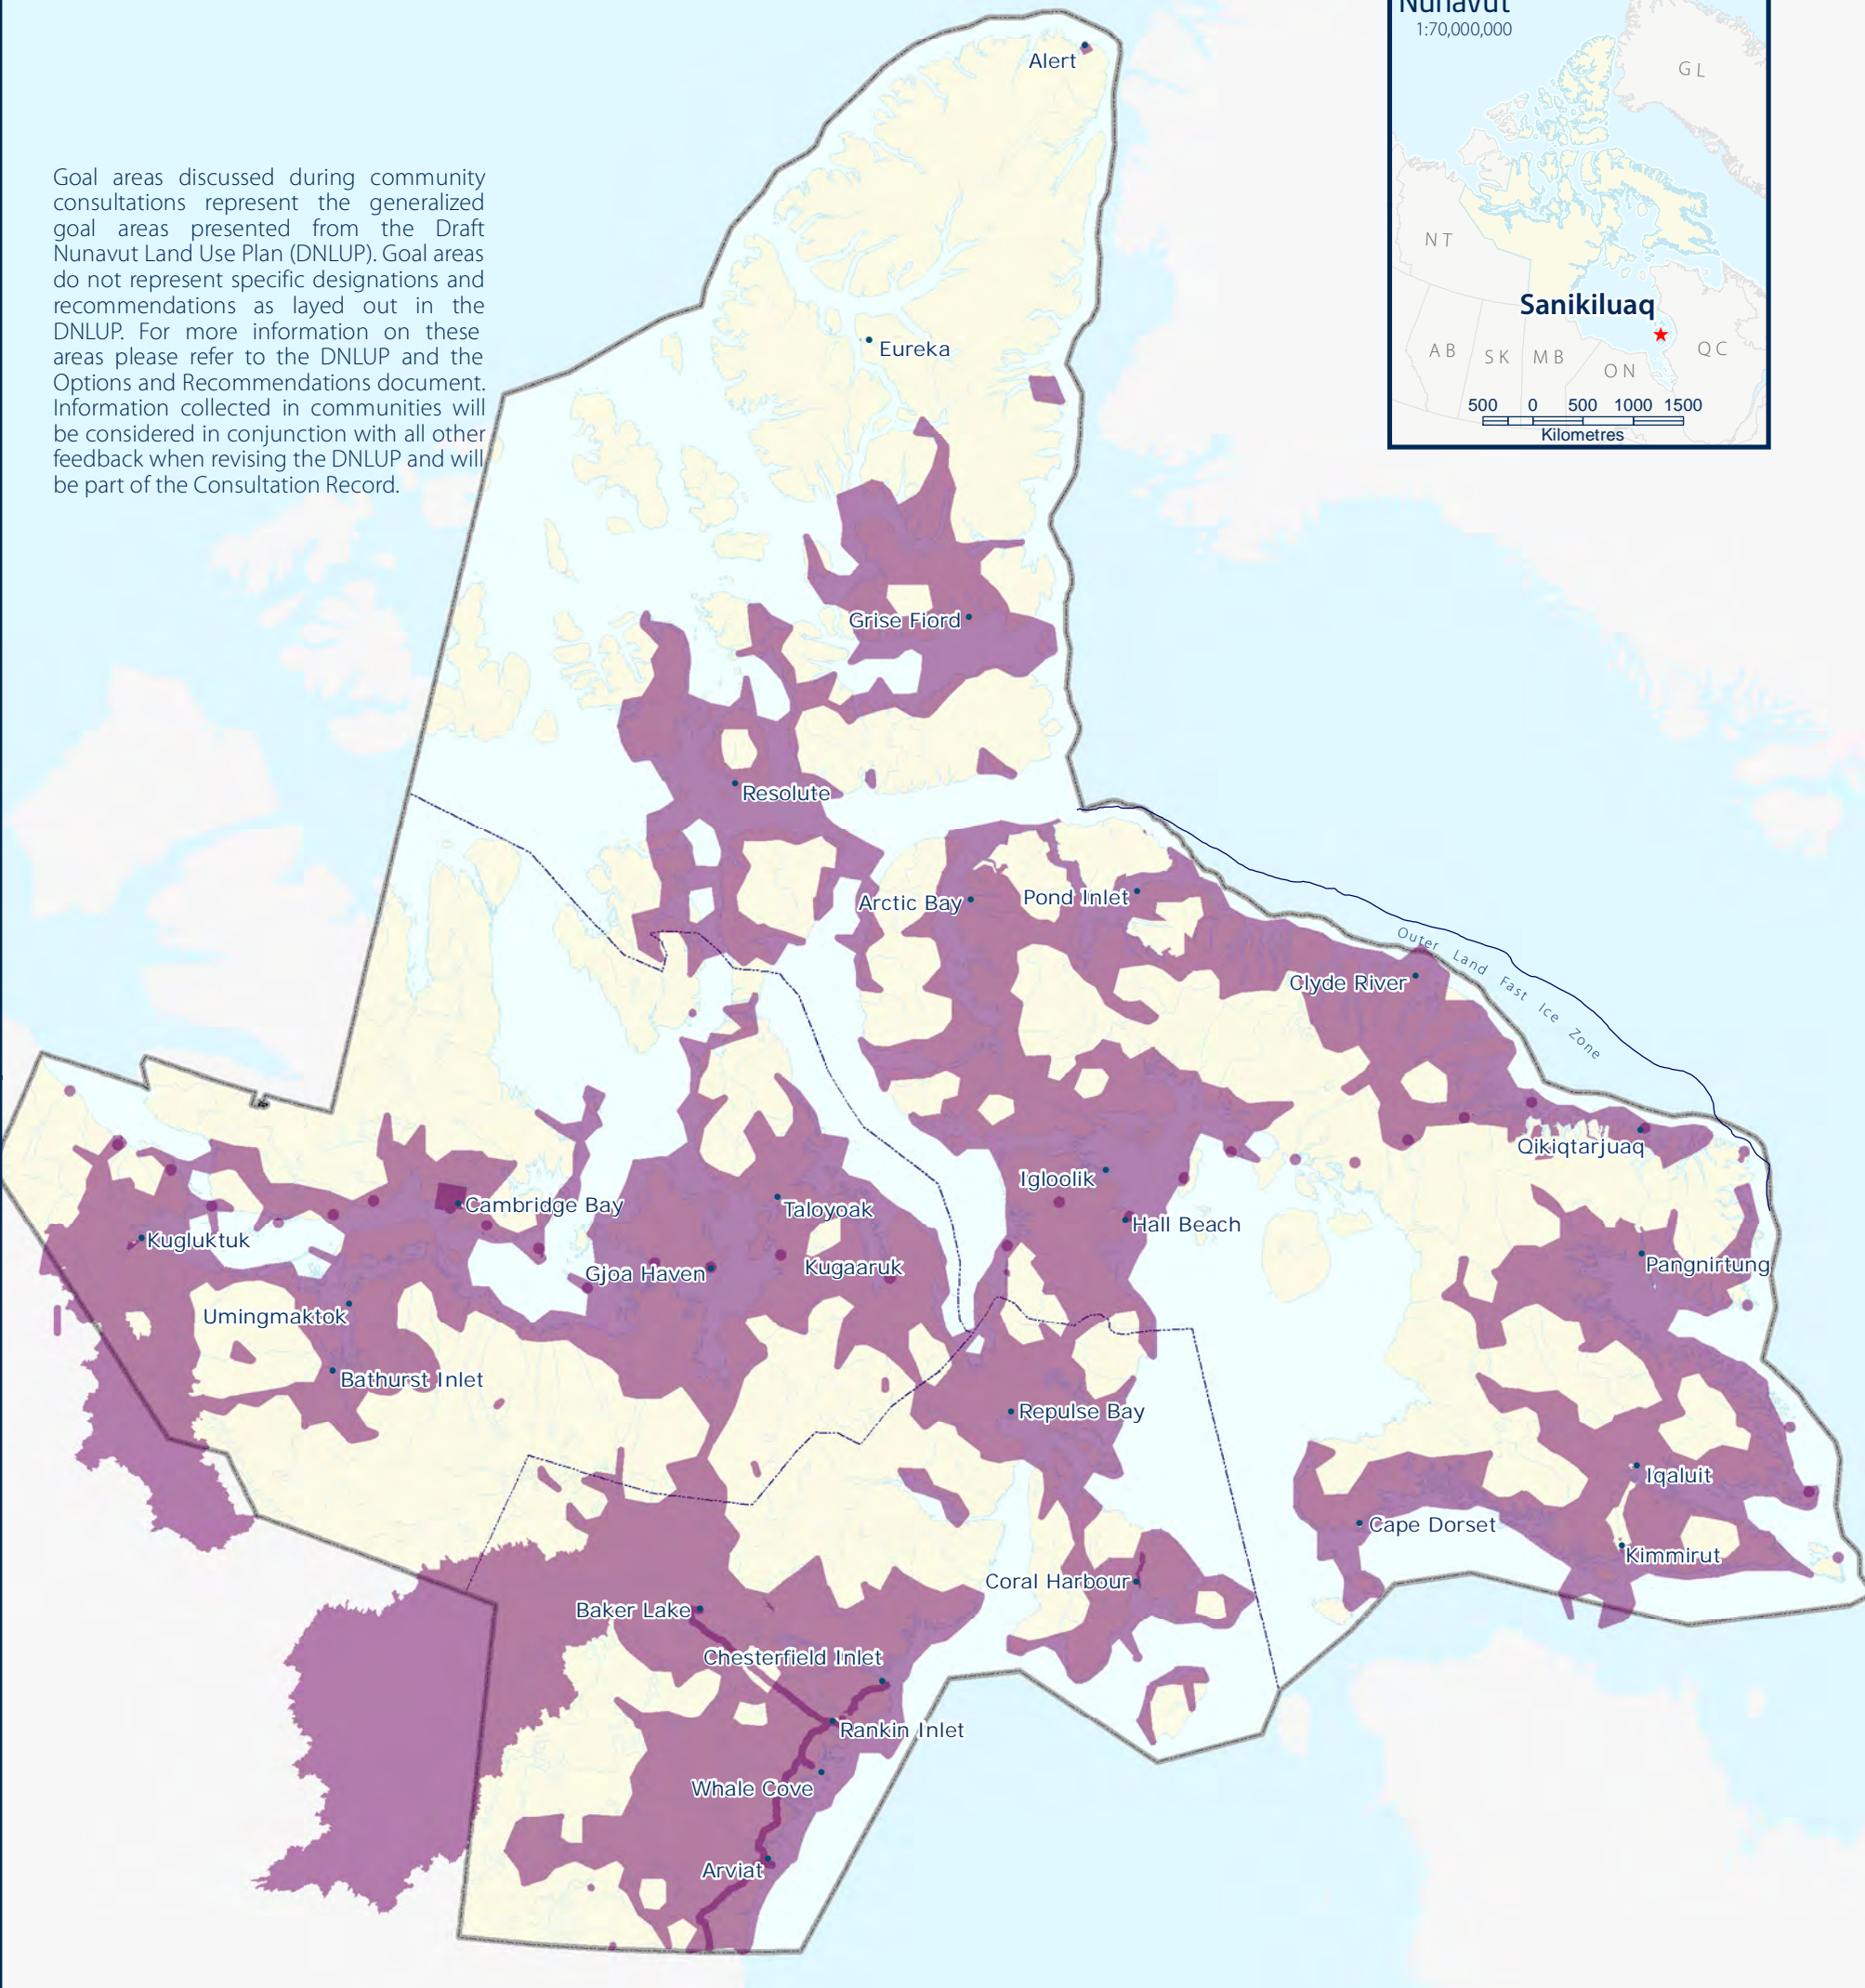

- The areas identified on Map 3 are considered by the Community to be important to Building Healthier Communities.
- In these areas, the community would like the NLUP to encourage activities that support community needs and cultural priorities.

This feedback will be considered in conjunction with all other feedback when revising the DNLUP.

-  BHC Goal areas from the DNLUP discussed during community consultations
-  Additional BHC Goal areas identified during community consultations

Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

Chapter 5: Encouraging Sustainable Economic Development

Encouraging Sustainable Economic Development was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

5.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented with the following areas important to Encouraging Sustainable Economic Development;

- Mineral Exploration and Production
- Oil and Gas Exploration
- Commercial Fisheries

The importance of these issues and areas to Encouraging Sustainable Economic Development was not disputed by participants during the information sharing and gathering sessions.

5.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Encouraging Sustainable Economic Development during the information sharing and gathering sessions. The additional areas identified are;

- Commercial fisheries
- Eider duck down areas
- Soapstone areas
- Beach grass material for baskets

5.3 Areas of importance to Encouraging Sustainable Economic Development

Areas and issues discussed during the information sharing and gathering sessions as important to Encouraging Sustainable

Economic Development are illustrated on Map 4, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4 and Appendix 5.

Based on discussions with participants, the NPC understands that:

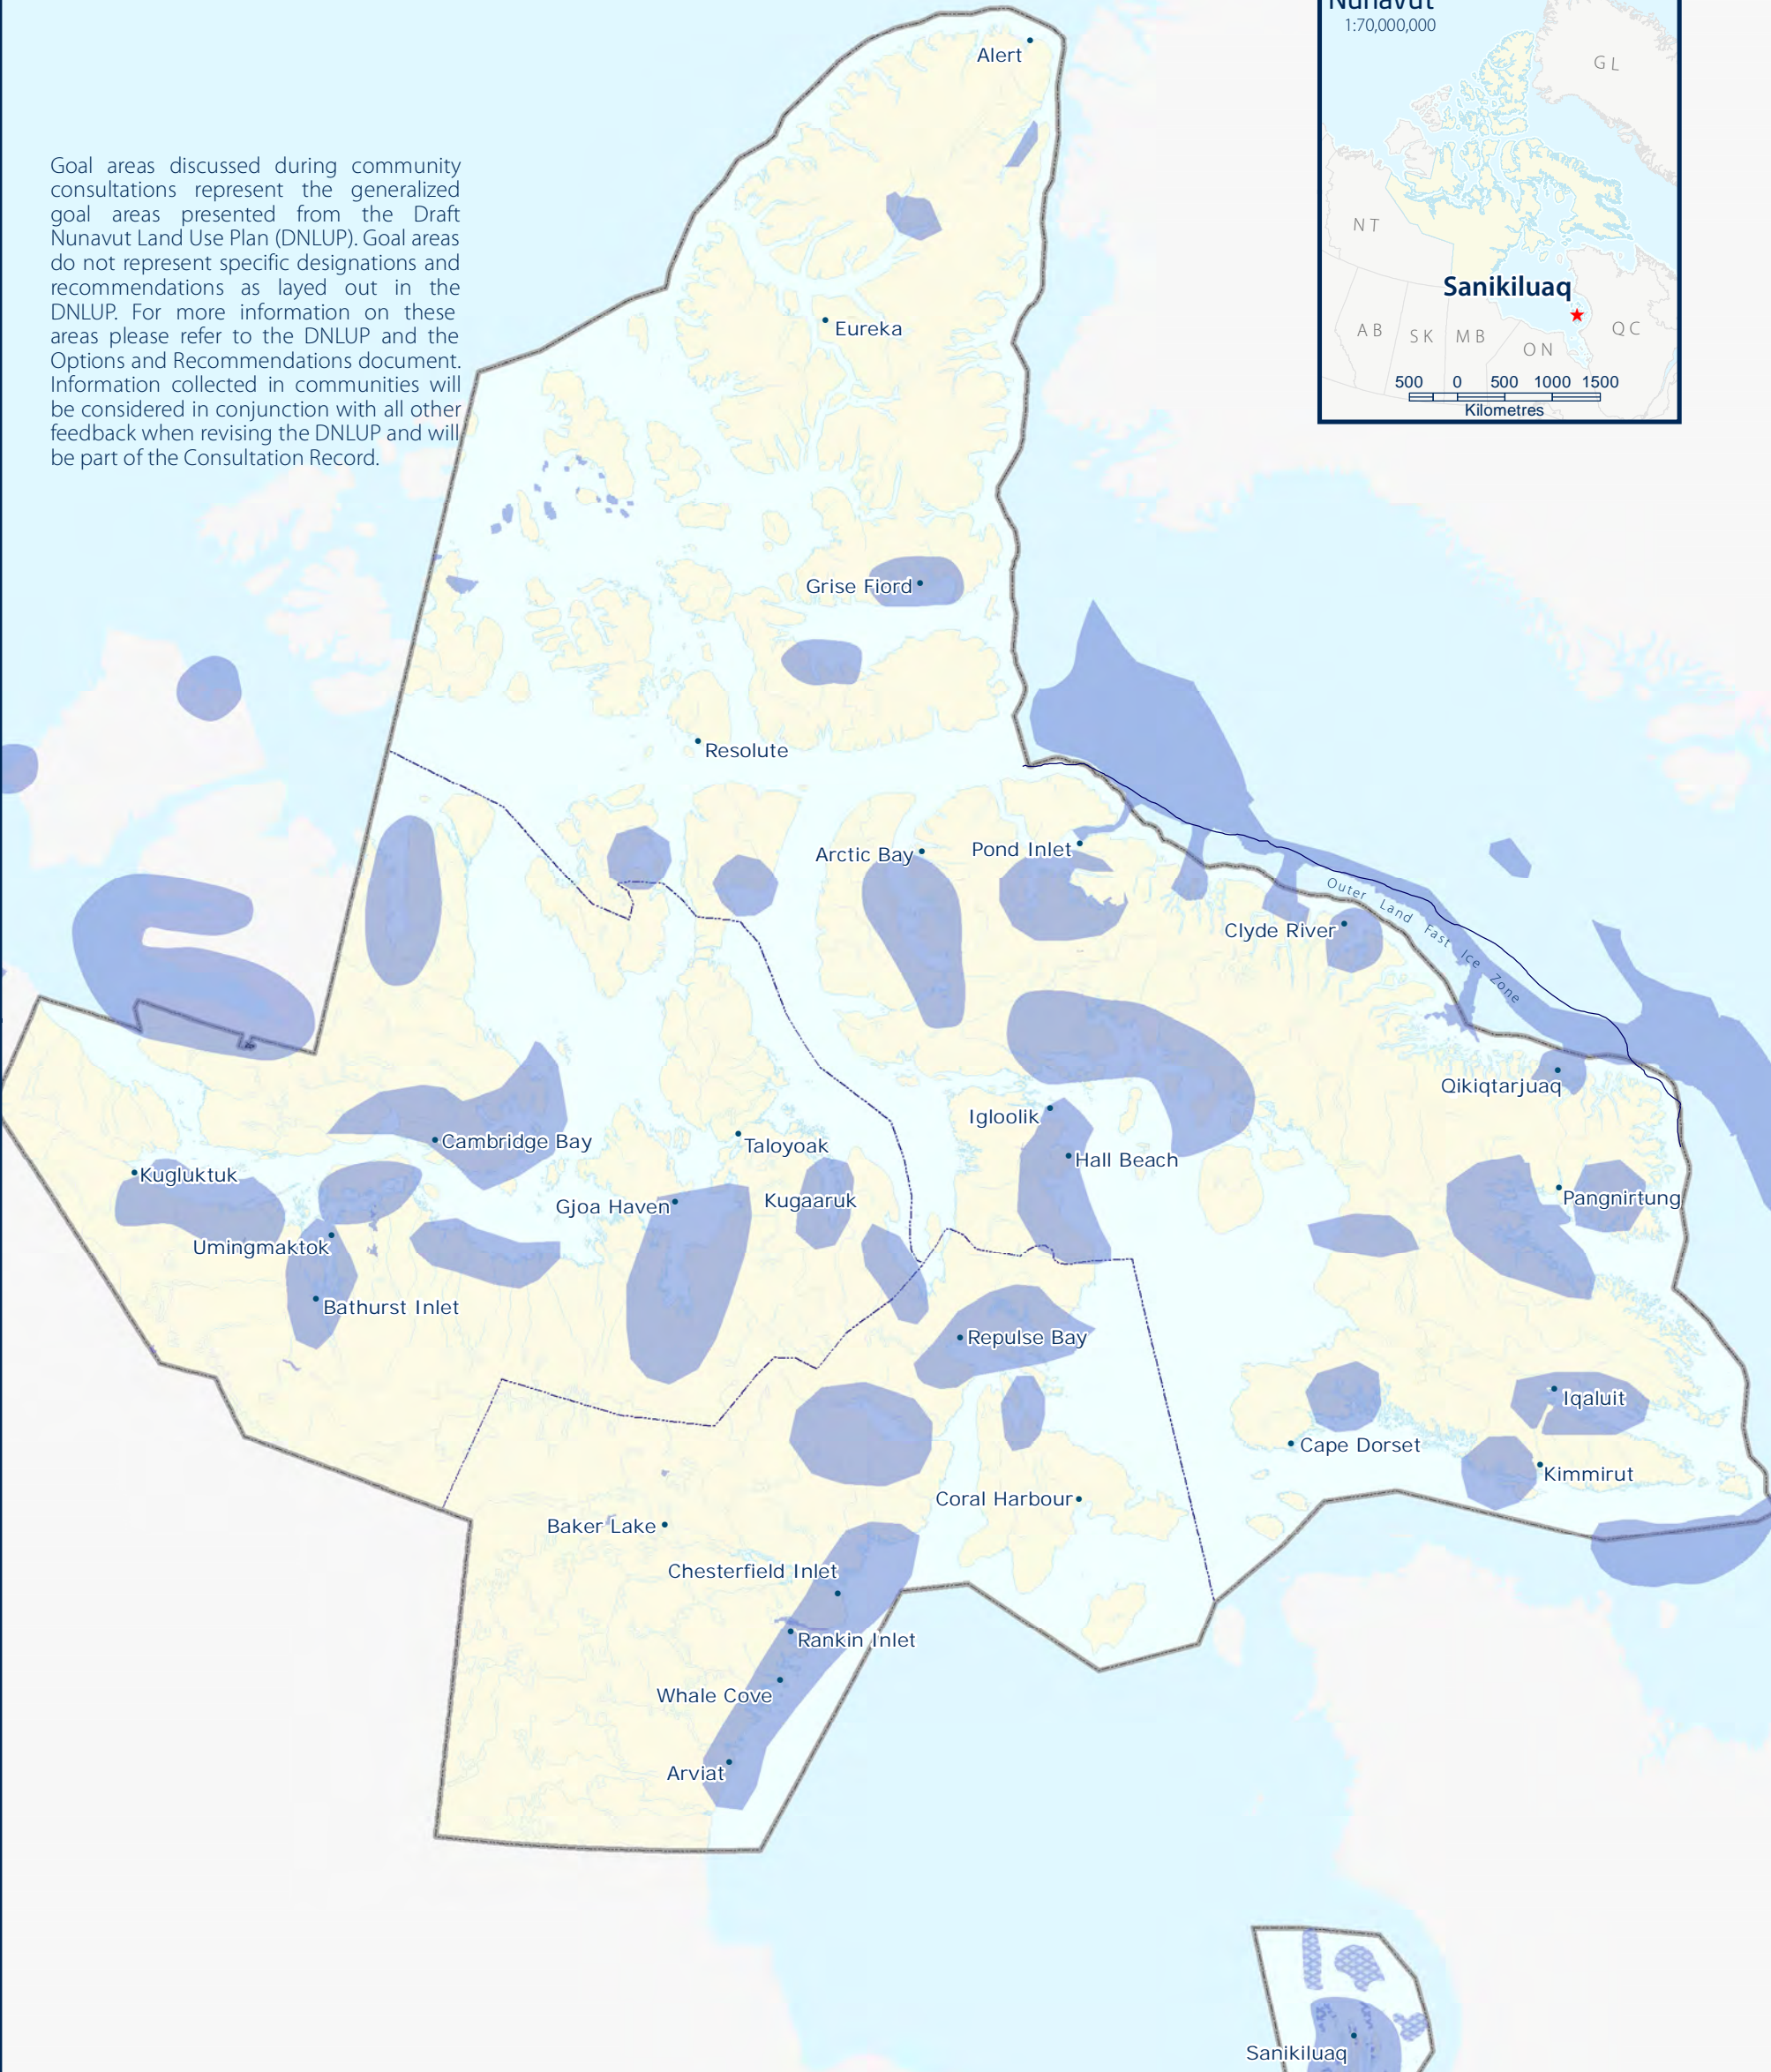

- The areas identified on Map 4 are considered by the Community to be important to Encouraging Sustainable Economic Development.
- In these areas, the community would like the NLUP to encourage activities that support economic opportunities and needs.

This feedback will be considered in conjunction with all other feedback when revising the DNLUP.

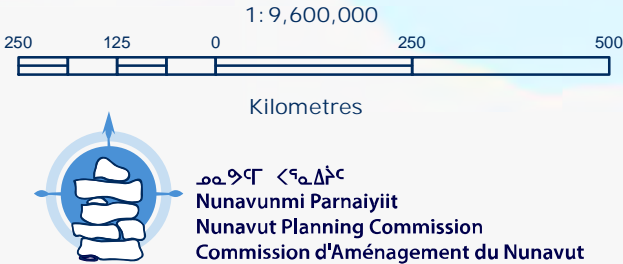

-  ESED Goal areas from the DNLUP discussed during community consultations
-  Additional ESED Goal areas identified during community consultations

Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

June-26-13

6.1 Areas identified in the Draft Plan

The DNLUP identifies areas important for a variety of uses. These areas were presented to participants during the workshop as Mixed Use Areas. These areas, as they occur around the community, are illustrated on Map 5.

6.2 Areas identified by participants

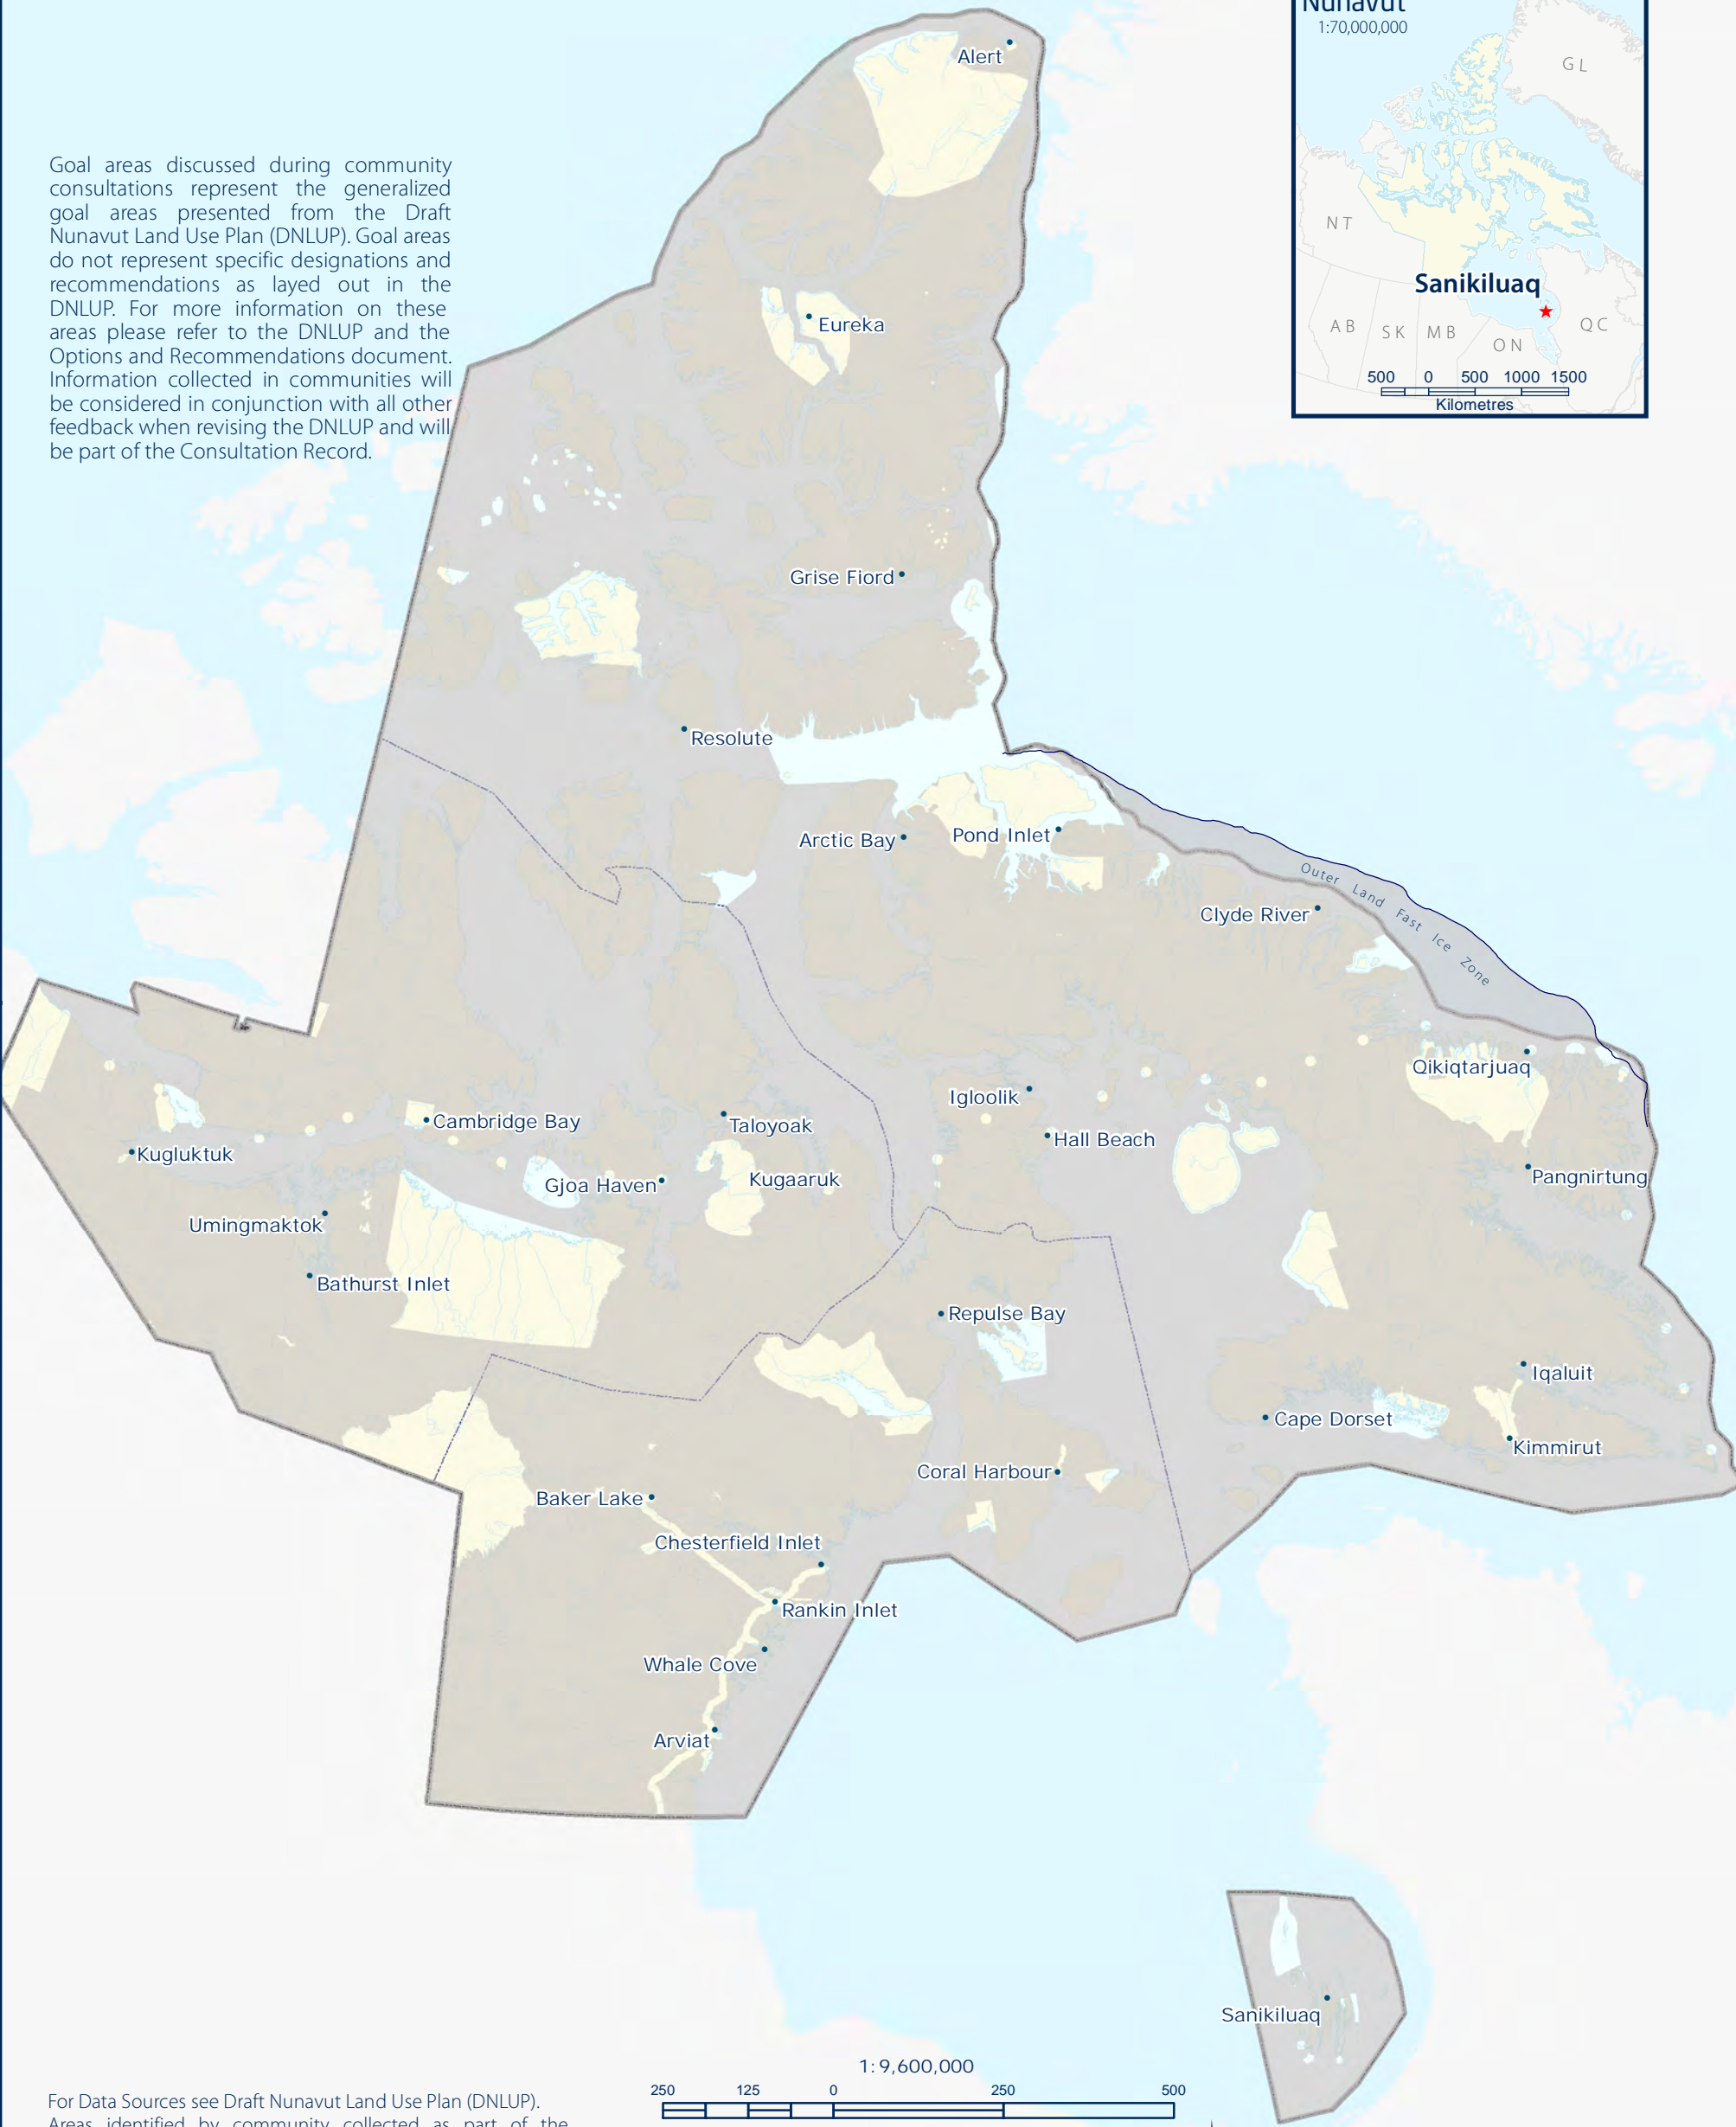

No additional areas were identified as Mixed Use by participants. However, some areas identified as Mixed Use in the DNLUP were considered by participants to require additional protection because of their particular qualities. These areas and the goals they are important for are identified on Map 6.

MU Goal areas from DNLUP discussed during community consultations

Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

7.1 Areas identified for multiple goals

All areas discussed with the community as important for a particular goal are shown on Map 7. In some instances, areas have been identified as important for multiple goals. These areas, and the specific goals they are important to, are also shown on Map 7. In these areas, the NPC will take all of the identified goals and all other feedback into consideration when revising the DNLUP.

Appendix 1: Elected Officials Meeting

The elected officials meeting was attended by the Mayor and members of the Hamlet Council and HTO. During the meeting, participants raised the following issues:

- Concerned with grave sites throughout the Belcher Islands. Should be included in the plan. Many sites have been recorded, and this information can be forwarded to the NPC.
- Concerned with fresh water drainage from hydro sites in Quebec. The fresh water mixes with the sea water and this has impacts on our wildlife, our food (eider ducks, marine mammals, etc.).

Appendix 2: Questions and Answers

During the community workshop, there was a question and answer period, which included a discussion of the following topics:

- Lack of communication in the past has made it difficult to understand planning for Nunavut. There have been a lot of changes and there are more changes to come in the future. I look forward to changes that would benefit to the work force and community. We love to be part of the planning for Nunavut and areas but to be part of planning for Nunavut we need more understanding and to be part of the communications.
 - The Commission answered that we will do mapping and you can look at the DNLUP for clarity. It's all straight forward and we've used the same procedures everywhere. This is a Draft Plan and when it's finalized it will be binding. As mentioned earlier, it will be reviewed every 5 years or so and amendments can be made then. The Plan changes over time. The Plan doesn't only apply to land, it also applies to other areas.
- For the past 2 years on Belcher Islands mining has been explored. We're concerned about the drilling.
 - The Commission answered that they are trying to talk to the company about what they are planning to do in the future. It's still in the primary process of discussions. We have heard concerns from communities. From what we've heard more needs to be discussed.

Appendix 3: Community Workshop Scanned Maps

Two groups completed the mapping session to identify important areas. This Appendix contains the maps that were used by participants to identify areas that are important to the following land use planning goals:

- Protecting and Sustaining the Environment
- Encouraging Conservation Planning
- Building Healthier Communities
- Encouraging Sustainable Economic Development
- Mixed Use

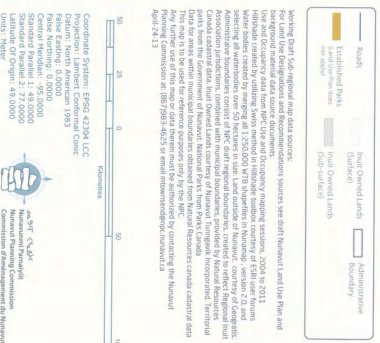

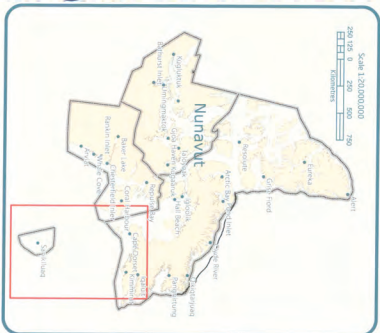

Also included on each map is a reference table that includes the specific values that were identified for the area.

During the mapping portion of the community workshop, the following concerns were raised that did not apply to a specific area that was identified on the maps:

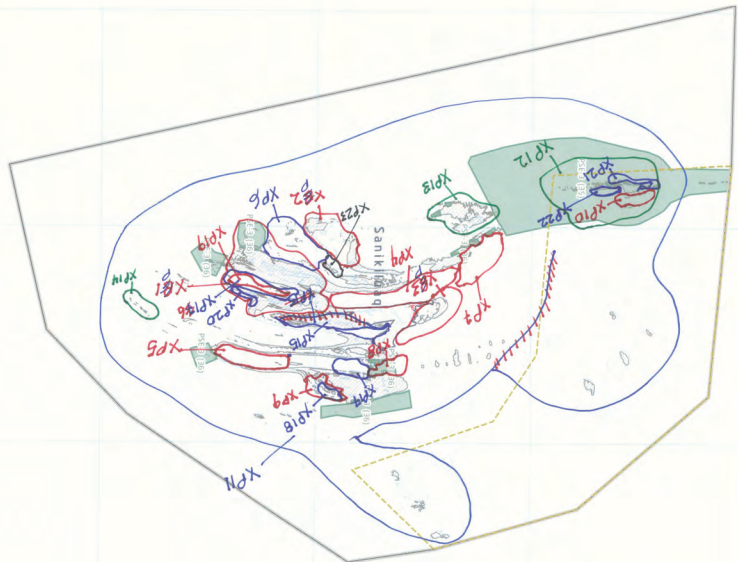

- Regarding Encouraging Sustainable Economic Development goal: People living the traditional lifestyle, sharing everything, and therefore there is no real commercial enterprise for profit.
- Foxes are all over the islands, white fox, red fox and cross-breeding fox
- Beluga are all over the islands
- There are 2 species of wolves on the island
- There are berries all over the island, blue berries, black berries, apple crabs too

| MU48 | This river has to be protected and the traditional name is Kuuraluk, River name (Qasigialik) the river goes to sea. It's rich for fishing area |
| MU49 | Fish Habitat |
| MU50 | protect for hunting |
| MU51 | protect for fishing and hunting |
| MU52 | fish go up river here. Needs to be protected for fishing area |
| MU53 | Would like a road put in this area from the community for easier access to fishing and hunting. |

Comments Welcome

May 15 - May 17 2014

Appendix 4: Follow-up Meeting

The NPC returned to the community to review a draft version of this report with the Hamlet Council, Hunters and Trappers Organization, and Community Lands and Resource Committee. The meeting included:

- A presentation of a draft version of this report
- An overview of the mapped information that was recorded for each topic:
 - Protecting and Sustaining the Environment
 - Encouraging Conservation Planning
 - Building Healthier Communities
 - Encouraging Sustainable Economic Development
 - Mixed Use
- General discussion and comments including:
 - Opportunities to provide additional comments
 - Timelines for completion
 - The need for more mapping of the bed of the ocean
 - The possibility of a Territorial park in Sanikiluaq
 - People from Inukjuak were interested in a temporary airstrip on the Sleeper Islands. What can be done? The need for NTI and Makivik to agree on how the shared areas will be used as outlined in Article 40 of the NLCA was discussed.
 - How the plan will be implemented
 - The need for more place names on the maps
