1.1 Context

The Nunavut Planning Commission (NPC) is preparing a land use plan to guide and direct resource use and development in the Nunavut Settlement Area (NSA). As part of its efforts, the NPC is facilitating discussions in each Nunavut community on land use and resource management issues. Information that is obtained from these discussions will be used to inform decisions regarding the further development of the Nunavut Land Use Plan (NLUP).

1.2 Purpose

This report presents information obtained during the NPC's visit to the community of Iqaluit. The purpose of the report is to inform decisions regarding the further development of the NLUP, ensuring that the plan reflects the priorities and values of residents.

It is important to note that the information contained in the Community Report will be considered in conjunction with all other feedback when revising the DNLUP

1.3 Methodology

Information was presented to and received from participants in Iqaluit in accordance with the Nunavut Planning Commission's Community Engagement Strategy (Engagement Strategy). The Engagement Strategy provides for the following methods for presenting and receiving information;

- Open house; information contained in the Draft Nunavut Land Use Plan (DNLUP) was presented on 7 multi lingual large format poster boards. Participants were encouraged to review the posters, ask questions and provide feedback.
- Elected Officials Meeting; The NPC Chairperson and NPC staff met with senior and elected officials in the community. The development process for the DNLUP, its content and next steps were presented. Comments and questions were recorded during the session and are contained in Appendix 1.

- Public Workshop; A formal presentation of the Draft Plan content was provided to participants, including a slide overview of its content. Following the presentation, questions and comments were received from participants. The questions, comments and responses are contained in Appendix 2.
- Wrap Up Session; The mapping portion of the Public Workshop was delayed until the Wrap Up Session. The mapping involved discussions regarding the topics presented in the DNLUP and encouraged participants to identify additional areas and issues important for inclusion in a NLUP. Information received during this session was recorded by NPC staff and is included in Appendix 3.

A follow-up meeting was held on April 10, 2013 to review a draft version of this report with the Hamlet Council, Hunters and Trappers Organization, and Community Lands and Resource Committee. A summary of this meeting is included in Appendix 4.

1.4 Public Awareness

The NPC raised public awareness regarding its visit to Iqaluit in accordance with the Engagement Strategy.

The DNLUP and supporting materials were mailed to the Mayor and Council of Iqaluit, the Hunters and Trappers Organizations (HTO) in September 2012. In addition, letters of invitation were sent to the Iqaluit Mayor and Council and HTO in advance of the NPC's visit to advise of the meetings and to encourage participation. Follow up phone calls were also made

Public notice of the various events was provided in the following ways:

- Nunatsiaq News and Nunavut News/North; notice of community meetings were posted in both newspapers a minimum of 45 days in advance.
- Co-op cable TV; notice of community meetings was run a minimum of 45 days in advance for one week

and run again for no less than 14 days before the meetings.

- Community radio; notices were read by the hosts and a live interview with the Commission Chairperson was conducted.
- Community bulletin boards; notices were posted on bulletin boards around the community 45 days and again 14 days in advance of the meetings.
- Community mail drop; one page flyers that announced the meetings and their purpose were delivered to the post office in each community for all mail boxes that accept unaddressed ad-mail.
- **nunavut.ca**; the schedule of community visits, the Draft Plan, and all supporting information was available on the Commission's website.

1.5 Community Population and Participation

Iqaluit is a community of approximately 6,700 people (Statistics Canada. 2011 Census). It is located on the southern coast of Baffin Island (see Figure 1).

The Commission visited the community on November 28-29, 2012. All events occurred as scheduled. The sessions were attended as follows;

- Elected Officials Meeting; the Mayor and members of the Hamlet Council and HTO attended the elected officials meeting.
- Open house; approximately 20 people attended the open house to review the Draft Plan.
- Public Workshop; approximately 25 people attended the presentation of the DNLUP and facilitated mapping sessions.
- Wrap Up Session; approximately 5 people attended the wrap up session.

Figure 1. Location of Iqaluit

Chapter 2: Protecting and Sustaining the Environment

Protecting and Sustaining the Environment was one of five topics presented to and discussed by participants during the Open House, Elected Officials Meeting, Public Workshop and Wrap up Session, collectively referred to in this document as information sharing and gathering sessions.

2.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Protecting and Sustaining the Environment.

- Key bird habitat sites
- Caribou Habitat sites
- Atlantic Cod Lakes
- Cumulative Impacts
- Transboundary considerations
- Climate change

The importance of these issues and areas to Protecting and Sustaining the Environment was not disputed by participants during the information sharing and gathering sessions.

2.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Protecting and Sustaining the Environment during the information sharing and gathering sessions. These additional areas are;

- Fishing areas
- Walrus haul outs
- Caribou habitat
- Bird nesting
- Hunting areas

2.3 Areas of importance to Protecting and Sustaining the Environment

Areas and issues discussed during the information sharing and gathering sessions as important to Protecting and Sustaining the Environment are illustrated on Map 1, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 3

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 1 are considered by the Community to be important to Protecting and Sustaining the Environment.
- In these areas, the community would like the NLUP to encourage activities that support environmental protection and management needs, including wildlife conservation, protection and management.

PSE Goal areas from the DNLUP discussed during community consultations Additional PSE Goal areas identified during community consultations Nunavut 1:70,000,000 Alert GL Goal areas discussed during community consultations represent the generalized Iqaluit goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these Eureka areas please refer to the DNLUP and the Options and Recommendations document. 500 1000 1500 Information collected in communities will 500 be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record. Chapter 3: Encouraging Conservation Planning

Encouraging Conservation Planning was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

3.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Encouraging Conservation Planning;

- National Parks Awaiting Full Establishment
- Proposed National Parks
- National Marine Conservation Areas
- Thelon Wildlife Sanctuary
- Migratory Bird Sanctuaries
- National Wildlife Areas
- National Historic Sites
- Territorial Historic Sites
- Heritage Rivers

The importance of these issues and areas to Encouraging Conservation Planning was not disputed by participants during the information sharing and gathering sessions.

3.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Encouraging Conservation Planning during the information sharing and gathering sessions. These additional areas are.

- Caribou calving grounds
- Fishing areas

3.3 Areas of importance to Encouraging Conservation Planning

Areas and issues discussed during the information sharing and gathering sessions as important to Encouraging Conservation Planning are illustrated on Map 2, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 3.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 2 are considered by the Community to be important to Encouraging Conservation Planning.
- In these areas, the community would like the NLUP to encourage activities that support environmental protection and management needs, including wildlife conservation, protection and management.

Chapter 4: Building Healthier Communities

Building Healthier Communities was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

4.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Building Healthier Communities;

- Areas of Community Interest
- Community Land Use
- Transportation Infrastructure
- Unincorporated Communities
- Alternative Energy Sources
- Community drinking water supplies
- Land remediation
- Northern Contaminated Sites Program
- Aerodromes
- Canadian Forces Station
- Northern Warning System sites

The importance of these issues and areas to Building Healthier Communities was not disputed by participants.

4.2 Areas identified by participants

No additional areas and issues were identified by participants as important to contributing to the goal of Building Healthier Communities during the information sharing and gathering sessions.

4.3 Areas of importance to Building Healthier Communities

Areas and issues discussed during the information sharing and gathering sessions as important to Building Healthier Communities are illustrated on Map 3.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 3 are considered by the Community to be important to Building Healthier Communities.
- In these areas, the community would like the NLUP to encourage activities that support community needs and cultural priorities.

Chapter 5: Encouraging Sustainable Economic Development

Encouraging Sustainable Economic Development was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

5.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented with the following areas important to Encouraging Sustainable Economic Development;

- Mineral Exploration and Production
- Oil and Gas Exploration
- Commercial Fisheries

The importance of these issues and areas to Encouraging Sustainable Economic Development was not disputed by participants during the information sharing and gathering sessions.

5.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Encouraging Sustainable Economic Development during the information sharing and gathering sessions. The additional areas identified are:

- Soapstone quarry
- Commercial fishery potential

5.3 Areas of importance to Encouraging Sustainable Economic Development

Areas and issues discussed during the information sharing and gathering sessions as important to Encouraging Sustainable Economic Development are illustrated on Map 4, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which

community feedback was recorded can be found in Appendix 3

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 4 are considered by the Community to be important to Encouraging Sustainable Economic Development.
- In these areas, the community would like the NLUP to encourage activities that support economic opportunities and needs.

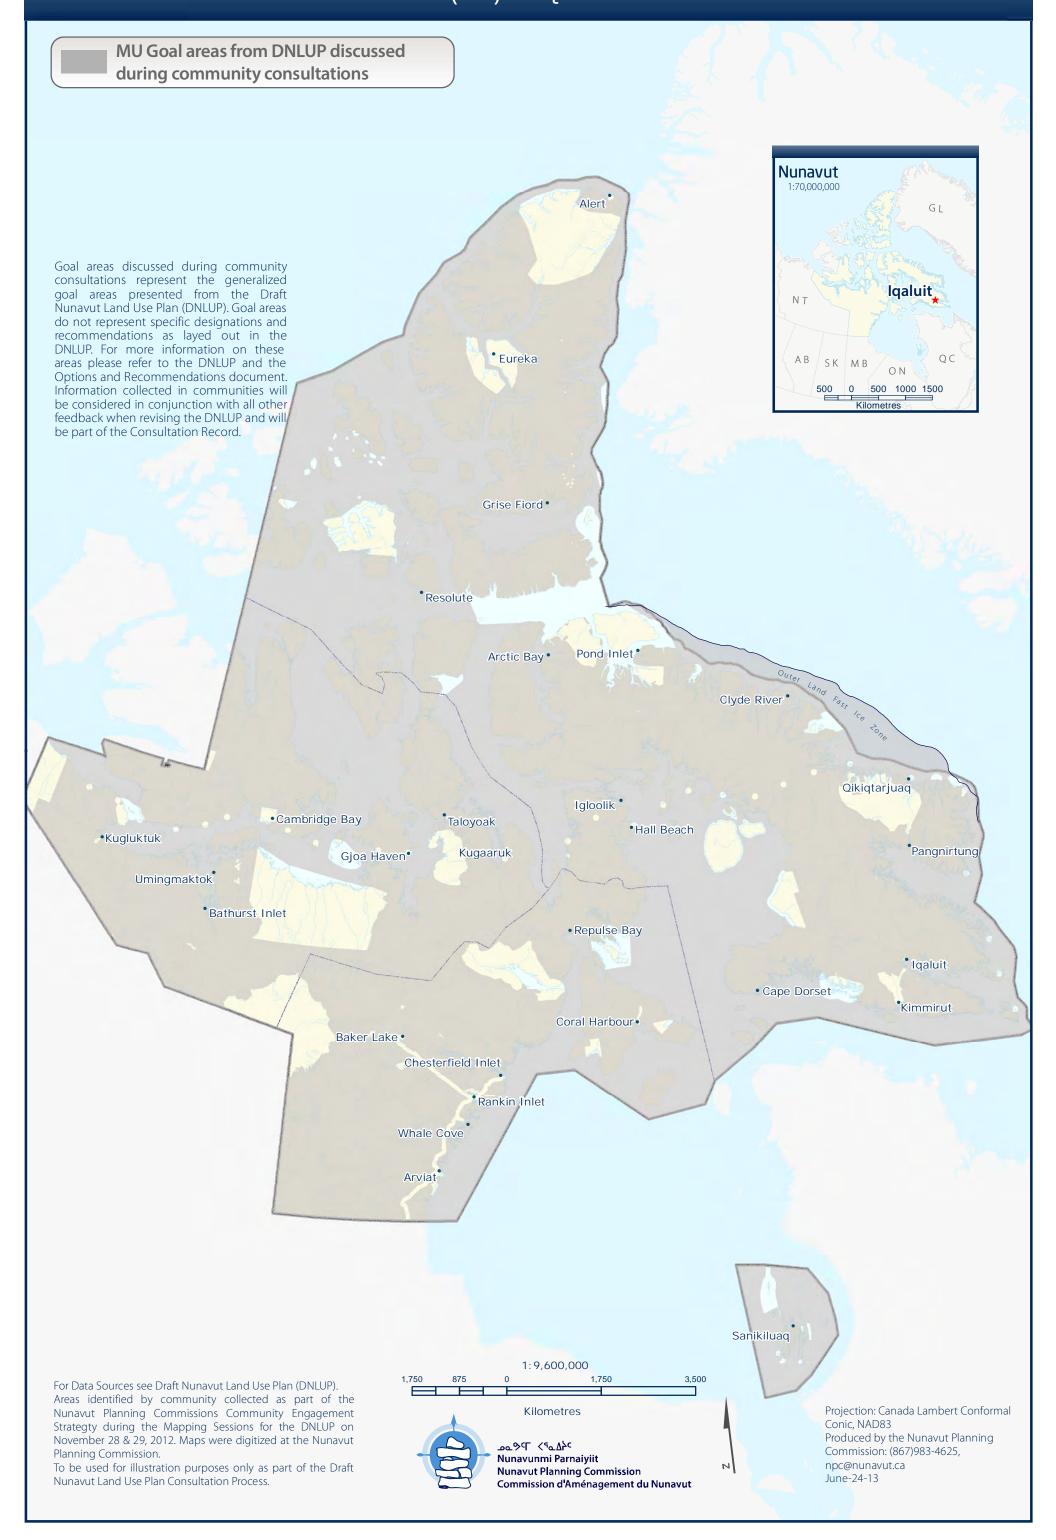

Areas identified in the Draft Plan

The DNLUP identifies areas important for a variety of uses. These areas were presented to participants during the workshop as Mixed Use Areas. These areas, as they occur around the community, are illustrated on Map 5.

Areas identified by participants

No additional areas were identified as Mixed Use by participants.

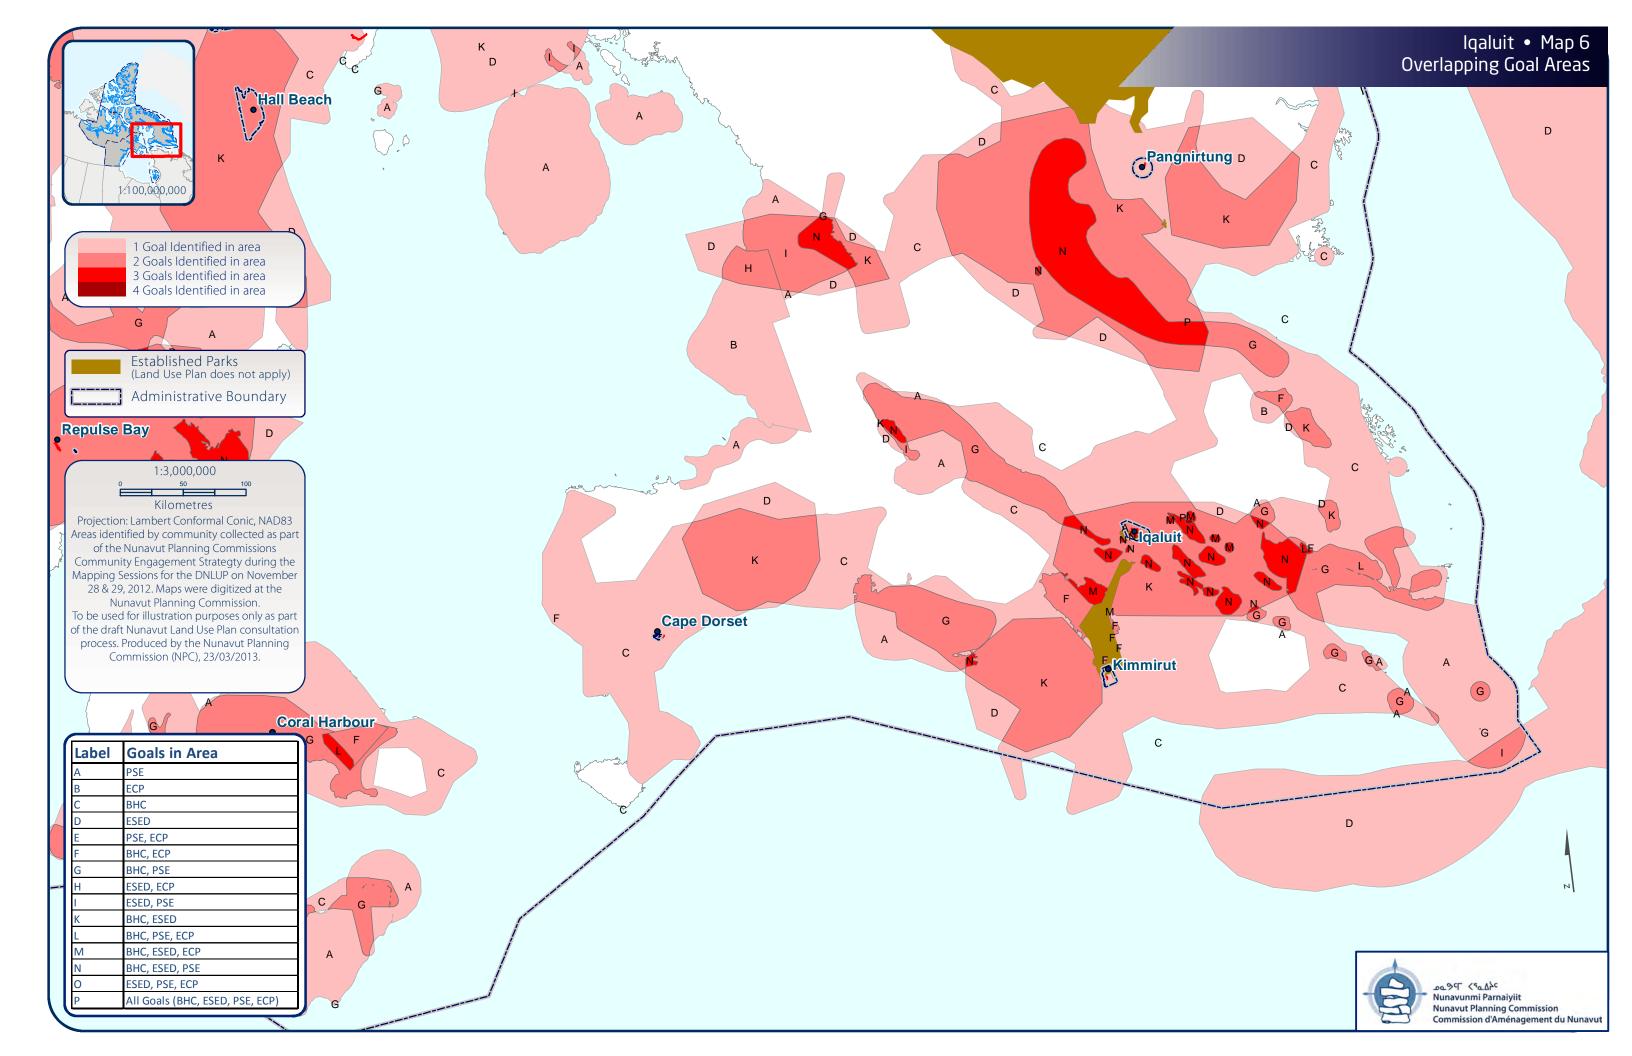

MIXED USE (MU) • IQALUIT • MAP 5

Chapter 7: Overlapping Goals

7.1 Areas identified for multiple goals

All areas discussed with the community as important for a particular goal are shown on Map 6. In some instances, areas have been identified as important for multiple goals. These areas, and the specific goals they are important to, are also shown on Map 6. In these areas, the NPC will take all of the identified goals and all other feedback into consideration when revising the DNLUP.

Appendix 1: Elected Officials Meeting

The elected officials meeting was attended by the Mayor and members of the Hamlet Council and HTO. During the meeting, participants raised the following issues:

- Advised the Commission of a future municipal water supply
- Advised the Commission of a change to the 4km aerodrome regulations implemented by Transport Canada
- Advised the Commission of potential future long range growth areas.
- Discussion about the identification of a buffer around the City boundary and the need to enlarge the municipal boundary
- Concerns about ballast water exchange
- Shipping routes
- Roads to mineral exploration sites

Appendix 2: Questions and Answers

During the community workshop, there was a question and answer period, which included a discussion of the following topics:

- Since Nunavut is like a gated community, could you control import of goods? For example, require that materials be able to be recycled and composted?
 - o The Commission answered that this is not a function of the land use plan, and that the purpose of the plan is to guide and direct resource use and development.
- High speed cable cars are an option to move between Iqaluit and Kimmirut. There is value in alternate energy sources (including hydro). Also, gas is a better alternative energy source to diesel.
 - o The Commission answered that the land use plan depicts how land should be used, and municipal governments are responsible for their own uses.

Appendix 3: Wrap Up Session

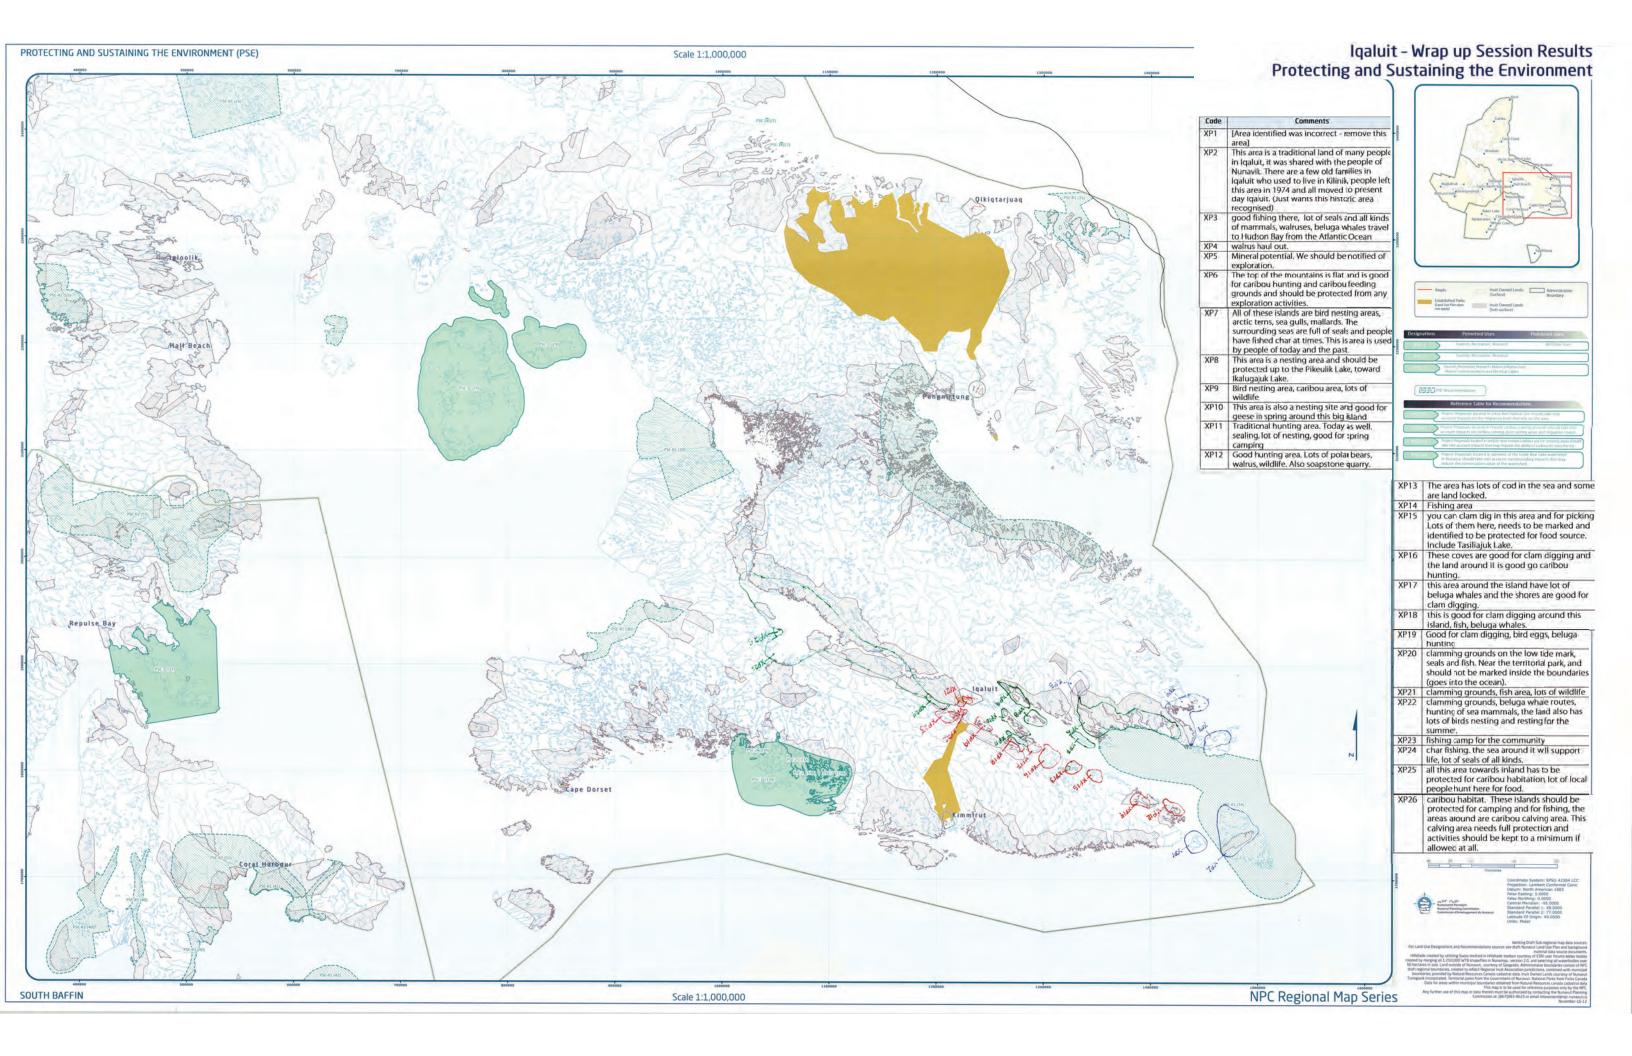

One group completed the mapping session to identify important areas. This Appendix contains the maps that were used by participants to identify areas that are important to the following land use planning goals:

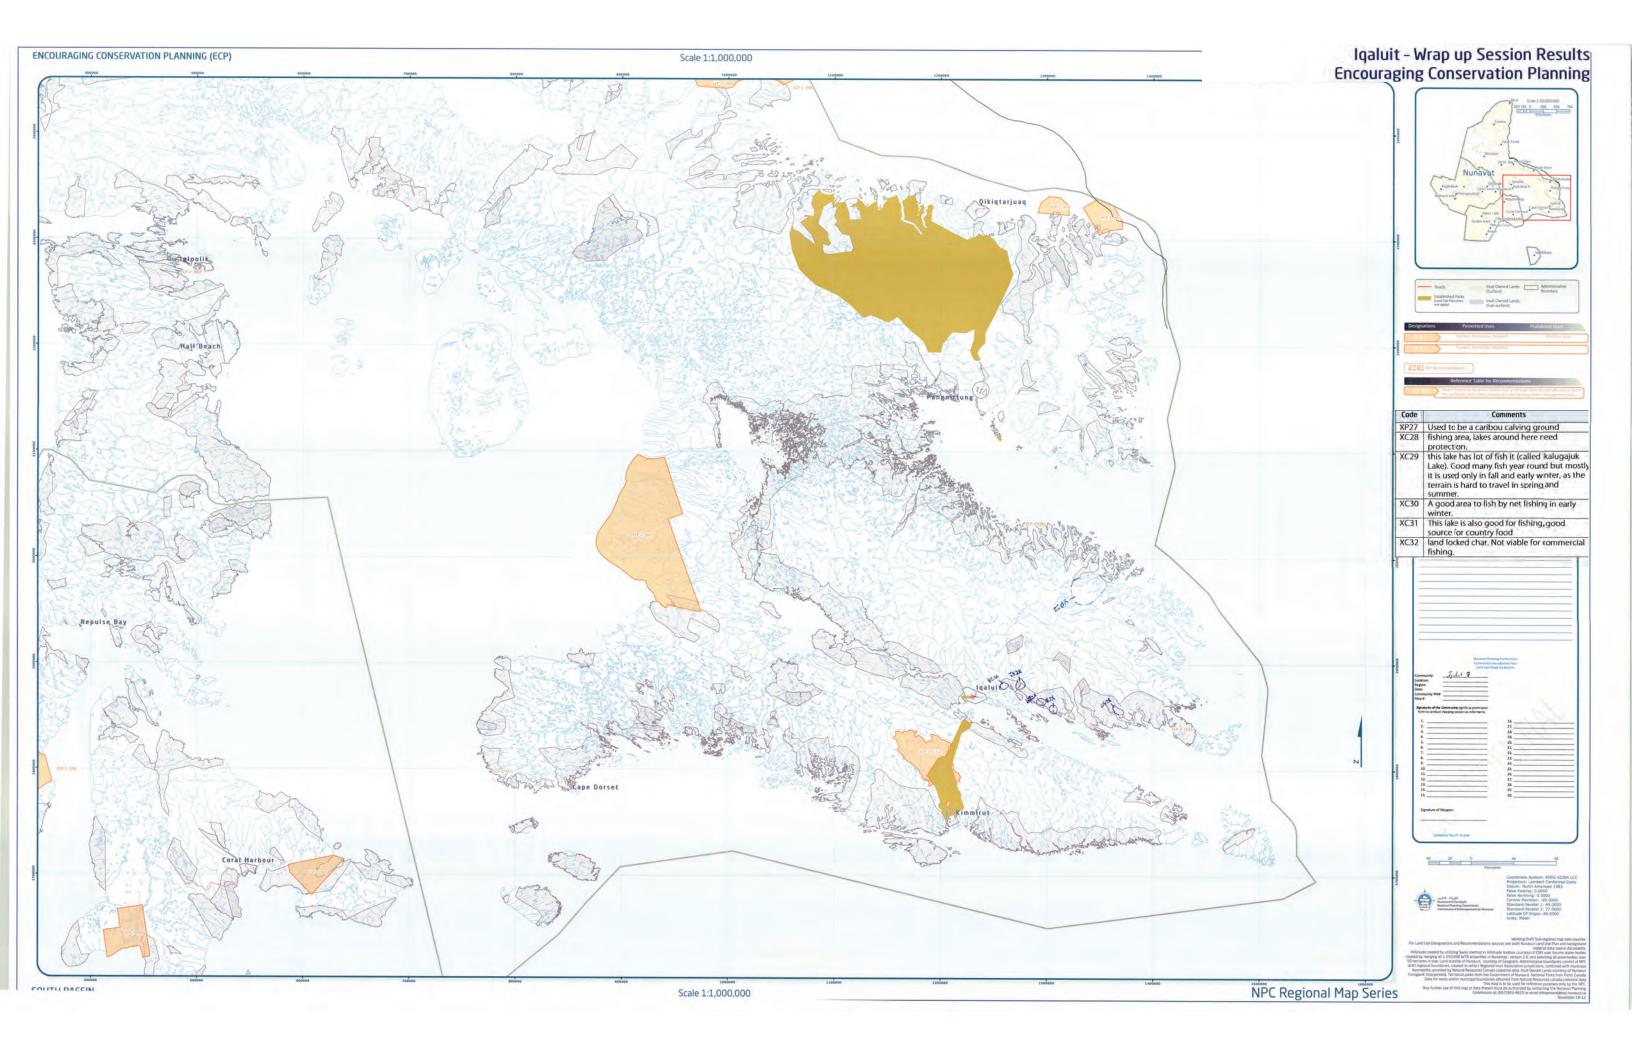

- Protecting and Sustaining the Environment
- Encouraging Conservation Planning
- Building Healthier Communities
- Encouraging Sustainable Economic Development
- Mixed Use

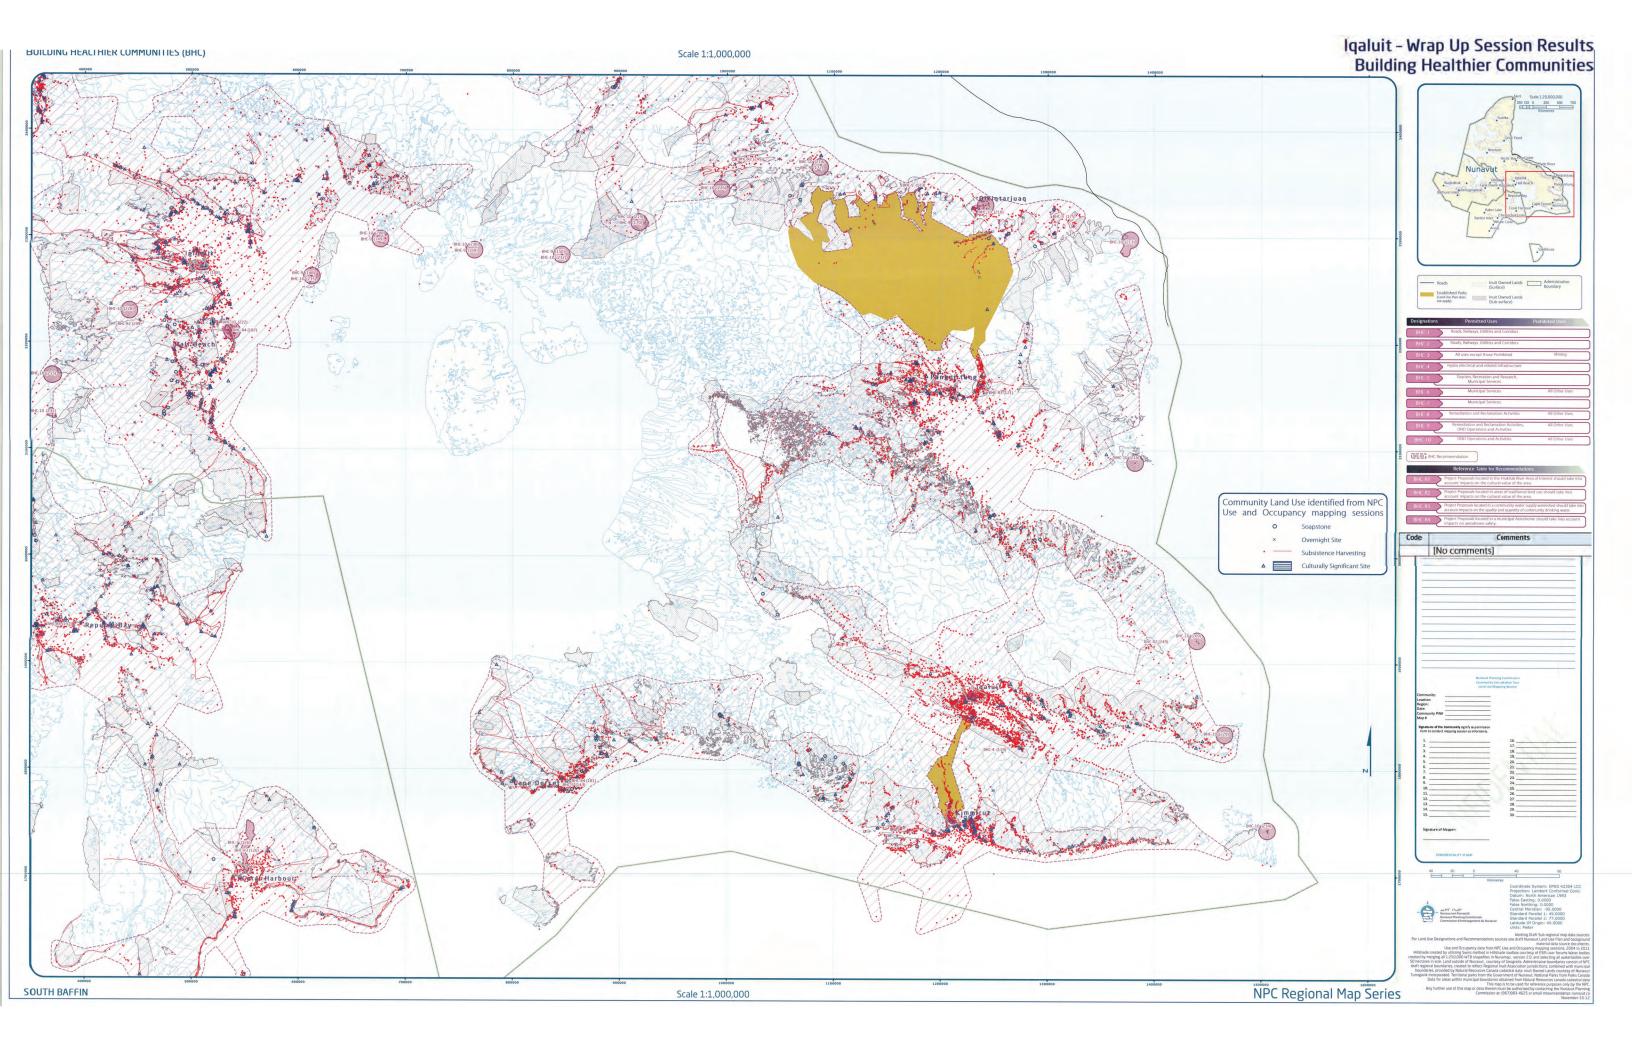

Also included on each map is a reference table that includes the specific values that were identified for the area.

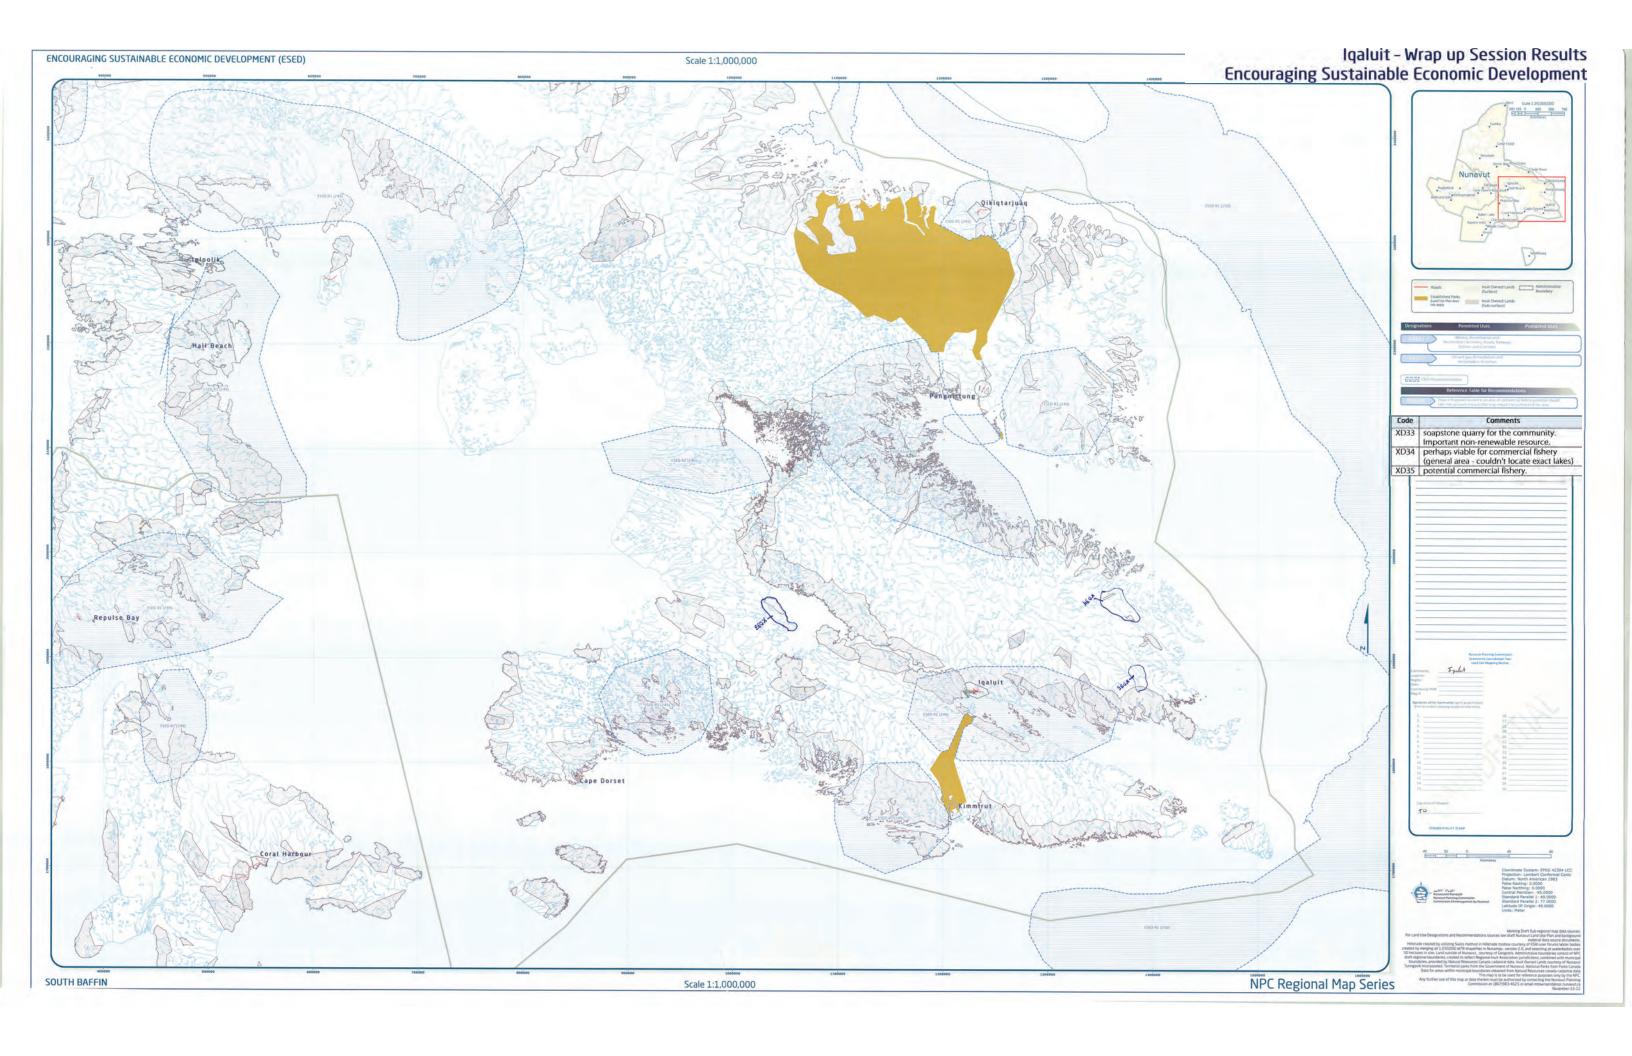

During the mapping portion of the community workshop, the following concerns were raised that did not apply to a specific area that was identified on the maps:

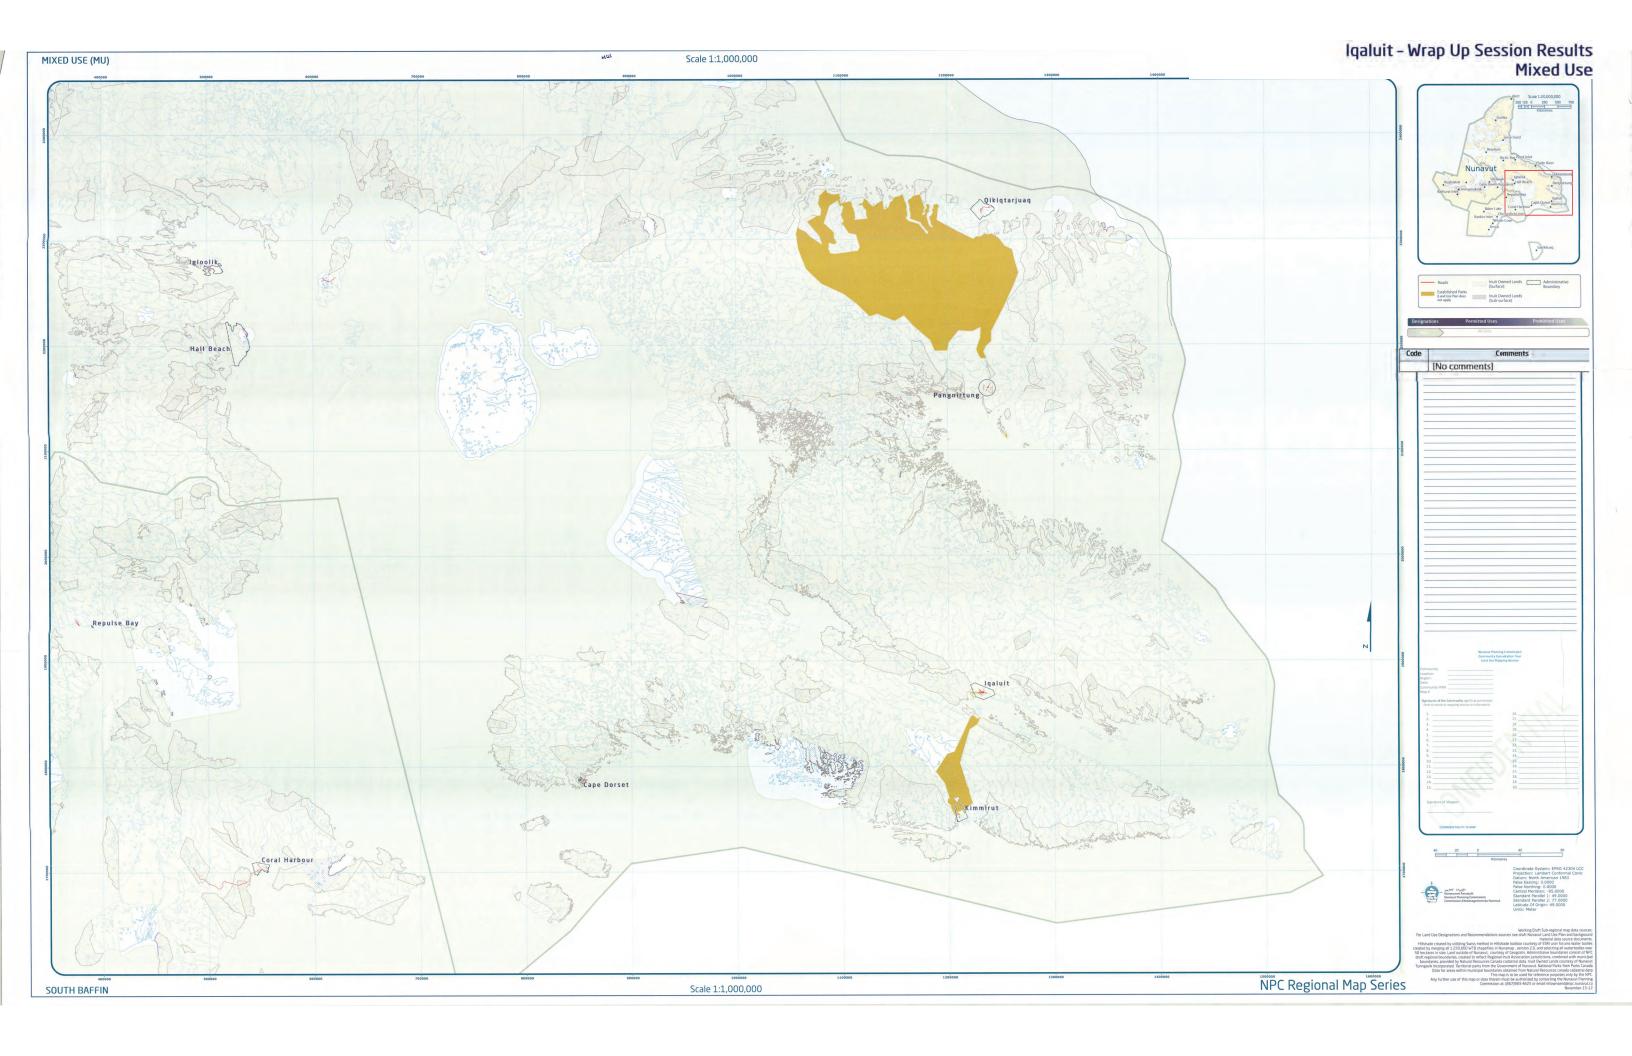

- Areas identified on the PSE map are important
- Community land use data on BHC map looks complete (no additional comments)
- Feasibility studies needed to confirm what lakes are viable for commercial fishery, what parts of Frobisher Bay are good for commercial fishery.

Appendix 4: Follow-up Meeting

The NPC returned to the community to review a draft version of this report with the Hamlet Council, Hunters and Trappers Organization, and Community Lands and Resource Committee. The meeting included:

- A presentation of a draft version of this report
- An overview of the mapped information that was recorded for each topic:
 - o Protecting and Sustaining the Environment
 - o Encouraging Conservation Planning
 - o Building Healthier Communities
 - o Encouraging Sustainable Economic Development
 - o Mixed Use
- Potential changes to the classification of a few mapped areas were discussed and agreed to.
- General discussion and comments including:
 - o We want our water supplies protected. We want the watershed of the 2nd water supply protected.
 - o Discussion of overlapping issues
